GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

ARCHÆOLOGY.

PROGRESS REPORT

OF THE

ARCHÆOLOGICAL SURVEY OF INDIA, WESTERN CIRCLE, FOR THE YEAR ENDING SIST MARCH 1910.

PART I.

L-OFFICE ROUTINE.

This will be my last Progress Report, as I shall retire from the public service from the 13th of September next. It will be 35 years, all but 3 months, since I first joined the Archæological Survey under Dr. Burgess, and I am the last of that party. Before leaving, I must put on record my full satisfaction with the work of Mr. Nārāyan Mahādev Tāṭake, my head clerk, whose uniform application and industry have been praiseworthy. The rest of the establishment are more or less new hands, and it is hardly possible to say much as yet regarding their work more than that they are steady and diligent. They were all most useful to me in my excavation work in Sind, readily taking up the function of overseers in charge of the gangs of coolies employed. Mr. Nārāyan Wāman Kittur, my second clerk and typist, promises well; he is rapid and accurate in his work.

2. During the monsoon recess of 1909 the usual work at head-quarters occupied us. I have already, in previous reports, specified the nature of our varied duties during that period of the year. We are always most fully occupied and never seem able to do all we would wish to for want of time.

II.—THE YEAR'S WORK.

- 3. On the 1st of April, 1909, I was at head-quarters, Poona, on my way through from Sind and Rājputānā to the Bijāpur district, where the remainder of last touring season was spent, partly at Bijāpur, where I had to consult the Public Works Department about difficulties which had arisen regarding work in progress at the Ibrāhim Rauza and the Asār Mahāl, and partly amongst the very old temples at Aihole, making notes with the Public Works Department Sub-divisional Officer for their conservation and repair. Another visit to Bijāpur was necessitated in July.
- 4. In November I was asked to conduct the Viceregal party over the old buildings of Ahmedābād and Bijāpur and the caves of Elephanta. This obliged us to defer starting on our regular tour until late in the month, when I proceeded to the Kanherī Caves in company with the Collector of Ṭhāṇā, in order to arrange on the spot, with the proprietor, Mr. Chhabildās Lallubhāi, for their future conservation and maintenance.

- 5. Returning to Bijapur, we turned our steps towards the very old town of Pattadakal, six miles west of Aihole, and, like that Pattadakal. place, full of ancient temples of the early Chalukyan period. Notes were here made for the conservation and repair of the temples, which are mostly in ruins.
 - Bādāmi next claimed our attention for the same reason, and from there we continued our tour into the Dharwar district in Badami, Gadag, Haveri, Bankapur, Unkal. order to examine, with a view to conservation, old temples at Gadag, Hāveri, Bankāpur and Unkal.
- 7. In the Belgaum district we visited the temples at Belgaum itself and at the Gokāk Falls. Between the Falls and Dhupdal Belgaum, Gokak Falls, railway station are the Konnur dolmens. Konnur. brought us up to the Christmas holidays, and advantage was taken of these to send our kit on ahead to Mīrpūr-Khās in Sind.
- Almost as soon as I had arrived at Mirpur-Khas, I was called away to Central India to go over the conservation works at Māṇdu with Major Blakeway, Secretary to the Mandu. Honourable the Agent to the Governor-General in Central India, so that I did not get properly to work on the excavation of the stūpa at Mīrpūr-Khās until the 2nd February.
 - Excavation work on the Buddhist stūpa at Mīrpūr-Khās occupied us until the 23rd of March. An account of this work and Mirpur-Khas. its results will be found in Part II of this report.
- 10. Our next move was to Tando Muhammad Khān, near which place stand the remains of another, but rather smaller, Tando Muhammad Khan. It is situated close to the Fuleli canal and stupa.railway, about 6 miles to the north-west of the town. Another two miles in the same direction, on the top of the hill, are the remains of what was probably another, where carved and decorated bricks have been found. It was too late in the season to attempt excavation here. It is reserved for next-season.
- Another place that we visited was Jherrick on the Indus, where, upon a hill three and a half miles to the south, on the Tattā road, are the remains of a Buddhist stūpa, Jherrick. which was dug into some fifty-seven years ago by a Mr. Cole. Carved bricks from this are in the Museum of the Bombay Branch of the Royal Asiatic Society.
- From Jherrick I went to Karāchi to get photos of the bronze image **12.** of Brahma at the Museum, which was discovered Karachl. some years ago near Mîrpūr-Khās, and also to see whether there were any objects in the collection from Buddhist sources.
- On our way back to Head-quarters I visited Abū to advise upon some necessary conservation work at the Achalesvara temples; and a committee meeting of the Rājputānā Abu, Almer. Museum, at Ajmer, took me there for a day or two.
- 14. On the 28th April I met the Director-General of Archæology in Bombay, who was on his way to Europe on leave.

Superintendent's Diary.

1909.

April

July

4th to 9th . Visited Bijāpur.

10th to 14th . On the way to Aihole.

15th to 25th . Halt at Aihole. 26th to 28th . Returned to Head-quarters, Poona.

29th to July. At Head-quarters.

17th.

18th to 19th. Visit to Bijāpur. 20th to Nov- At Head-quarters.

9th.

```
November 10th to 13th. Visit to Ahmedabad to attend upon the Viceregal party.
             14th to 16th . At Head-quarters.
             17th to 18th . Visit to Elephanta Caves to attend upon the Viceregal party.
19th to 22nd . Visit to Bijāpur for the same purpose.
23rd ... At the Kanheri Caves with the Collector and proprietor.
                           ... Returned to Bijapur.
             25th
                     to 1st Halt at Bijapur.
             26th
                December.
             2nd ... Proceeded to Bādāmī en route to Pattadakaļ.
5th to 9th ... Halt at Pattadakaļ.
December 2nd
             10th to 11th. At Badami.
             12th ... At Gadag.
13th to 16th . Halt at Haveri.
             17th to 18th . Halt at Bankapur.
                          ... Visited Unkal near Hubli.
             20th
             21st ... At Belgaum.
22nd to 23rd. At Gokāk Falls.
             24th to 2nd Christmas Holidays.
                January.
             3rd to 13th... Halt at Head-quarters to give time for kit to reach Sind.

15th ... Inspected the work carried out at the Jami Masjid, Broach.
January
             16th to 18th. Halt at Ahmedabad.
                          ... Arrived at Mirpūr-Khās, Sind.
             20th
                          ... Left Mirpūr-Khās for Māṇḍu in Central India.
             23rd
             26th to 30th . Halt at Mandu.
                          ... Returned to Mirpūr-Khas.
February
             3rd to 22nd Halt at Mirpūr-Khās.
                March.
              23rd
                           .. Proceeded to Hyderabad.
March
             24th to 28th . Halt at Hyderabad.
                          ... Proceeded to Tando Muhammad Khan.
             29th
                         1st Halt at Tando Muhammad Khan.
             30th to
                April.
             2nd to 3rd ... Tando Muhammad Khān to Jherrick.
4th to 10th... Halt at Jherrick.
11th to 12th . Went in to Karāchi.
April
                          ... Started for Abū Road.
             15th
             17th to 20th. At Mount Abū.
22nd to 23rd. At Ajmer.
24th to 26th. Return to Head-quarters, Poona.
                          ... Proceeded to Bombay to meet the Director-General.
             28th
                          ... Visited Worli Fort near Bombay to advise on its retention as a
              7th
June
                                listed monument.
                          ... Attended a meeting at Bombay of the Trustees of the Prince of
             13th
                                 Wales Museum.
     Note.—I have entered my diary of touring up to June since I shall be retiring in
September and this is my last Progress Report.
                         Assistant Superintendent's Diary.
           1909.
             1st to 14th ... Engaged in excavation work at Mandor.
April
                         ... Reached Junagadh.
             17th to 29th. Halt at Junagadh.
                         ... Returned to Poona.
May
             2nd to Nov- At Head-quarters.
               ember 2nd.
                         ... Left Poona for Nīm-kā-thānā.
November 3rd
             5th to 10th ... Halt at Nim-kā-shana.
             12th
                         ... Reached Bairas.
             13th to 22nd . Halt at Bairat.
                          ... Proceeded to Bhabru.
             23rd
             24th to 26th . At Bhabru.
             28th
                          ... Arrived at Amer.
             29th to
December 5th
                          ... Halt at Amer.
                          ... Left for Jaipur.
             6th
             7th to 14th ... At Jaipur.
             16th to 21st . Halt at Sanganer.
```

... Reached Chātsû.

25th to Jan-Christmas holidays.

nary 2nd.

1910.

January 6th ... Left Chāṭsū.
9th ... Arrived at Ringas.
11th to 13th... Halt at Khāṭū.
14th ... Proceeded to Rewāsā.

15th to 17th . At Rewāsā. 18th ... Visited Jin-mātā. 22nd ... Reached Sīkar.

27th to Feb-

ruary 3rd ... Halt at Haras.

February 7th ... Arrived at Raghunathgadh.

8th to 12th ... At Raghunāthgadh.
14th ... Reached Sakrāī.
19th ... Proceeded to Khandelā.
20th to 25th . Halt at Khandelā.
26th ... Went to Ajmer.

March 8th ... Broke up Camp and arrived at Phalodi. 10th to 14th . Halt at Phalodi.

15th ... Left for Pāṇḍukhā.
16th to 19th . At Pāṇḍukhā.
20th ... Proceeded to Meḍtā.
21st to 27th . Halt at Meḍtā.
29th to 31st . At Kekind.

15. I have already stated in last year's report that excavation work, started at Mandor by the Director-General of Archæology, lasted till about the middle of April 1909 and that I was there to help him. When the work was brought to a close, I immediately proceeded to Junāgadh to prepare estampages of the Asoka inscription in accordance with the instruction of the Bombay Government, General Department. This brought our touring season of 1908-1909 to an end.

16. We had also been asked to prepare estampages of the Aśoka inscription at Bairāṭ in the Jaipur State. Our next touring season consequently commenced with a visit to Nīm-kā-ṭhānā, from where we were advised to go to Bairāṭ. From Nīm-kā-ṭhānā I visited Māvṇḍā and Gaṇesar. At Gaṇesar no object of antiquarian interest was found, and at Māvṇḍā there was nothing to be seen beyond two Cuhatris.

17. After a rough journey, we reached Bairāt on the 12th of November 1909. Besides the actual work for which we had come here, we were engaged also upon visiting and photographing the ruins at and near Bairāt, an account of which will be found in the descriptive portion of the report. From Bairāt I proceeded to Bhābrū, about twelve miles S. S. W. of it. One of the inscriptions of Aśoka has been called the Bhābrā Edict. Bhābrā here is no doubt a mistake for Bhābrū. I made a very careful search at this place but did not find antiquarian remains of any sort. I am, therefore, convinced that Cunningham is right in calling it a Bairāt edict and supposing that it was originally on the Bījak-pahād there.

to Bairāt than the one running from Nīm-kā-thānā which I had been advised to take. Another good road to go there, I was told by the people, was the one passing by Ghāzi-kā-thānā to Alwar. From Āmer I proceeded to Jaipur. Here places of antiquarian interest such as Galtā, Gehtor, etc., were visited. I also inspected some old sculptures stored in the Museum and the Resident's garden. I was also able to consult some antiquarians here and prepare a list of antiquarian remains for the Jaipur State, the list that we were supplied with being in every way inaccurate and incomplete. I left Jaipur for Sāngāner, where Singhi's temple was photographed. There

[•] The following notes on his diary are by Mr. D. R. Bhandarkar.

are other objects at Sāngāner of local interest, such as Dādūpanthī temple and the image of Sāngā Bābā and so forth, but beyond cursorily glancing over these we did not work. We then proceeded to Chāṭsū, which was unfortunately plague-stricken when we were there. Still we received as much help as it was possible for the local authorities to give.

- 19. Soon after the Christmas holidays I turned to the western part of the Khatu, Rewasa Jin-mata.

 Syāmjî, but, beyond a few sculptures stuck in the walls of a Masjid here, no to go fit now remains. At Rewāsā similarly there were found two modern ten les wherein materials from ancient fanes had been used. One Chhatri built ya Vanjārā and lying outside the village close beside a well is particularly teresting. The pillars certainly originally belonged to some tenth century nple. Probably they were brought from Jin-mātā, which is only six miles stant from it. This last temple is doubtless of this period, but no pillars of the size of these Rewāsā Chhatri were found here. Here some inscriptions were found which are important for the history of the imperial Chāhamāna dynasty.
- 20. From Rewāsā I proceeded to Sikar on my way to Haras. Haras is 8 miles from Sikar; and on a lofty hill near this village are no less than three temples. One of these only is ancient, that which is locally known as the temple of Mahādeva. The remaining two are partially built of the materials of this ruined temple.
- 21. At Raghunāthgadh one ancient temple was discovered. From here Lohāgal, one of the most sacred places in Sekhāvāṭī, was visited. From Raghunāthgadh I proceeded to Sakrāī, which is another place of sanctity in this province. Here I found two old inscriptions and one ancient temple.
- Khandela.

 Khandela.
- 23. This brought my touring in the Jaipur State to a close, and I broke up my camp in order to go to the Jodhpur State. In the meanwhile I seized an opportunity to visit Ajmer to see whether any new inscription stones had been brought in the Museum. Till the beginning of March when I was there, there were only three new inscriptions. Two of these were found at Pushkar and the third at some place in the Bharatpur State.
- 24. My tour in the Jodhpur State began with Phalodi in the Medtä

 District. Here we were engaged in photographing two old temples and copying inscriptions therein.

 From here the adjoining villages of Rol and Jhālāvādī were visited. From Phalodi I proceeded to Pāndukhā, where impressions of an inscription in an old well were taken. We next went to Medtā. This was no doubt like Khandelā, an old place, but no old structure now exists beyond a few sculptures here and there. Medtā, however, abounds with Mahomedan buildings. From Medtā we proceeded to Kekind.
- 25. Here were found an old Hindu temple of the 10th century and a Jaina temple of about the 15th century. The Hindu temple is particularly interesting. It is no doubt now dedicated to Nilakantha-Mahādeva, but appears originally to have been one of some goddess, most probably Krishnakrodā.

Photographs taken during 1909-1910.

27. The Executive Engineer, Nasik District, sent an inspection report to the Superintending Engineer, Central Division, a copy of which has been forwarded to my office, together with the list of conservation works carried out during the year 1909-10. The report is as follows:—

"I have inspected the following archæological buildings during 1909-10 on the date shown against each—

- (1) Ankai Caves at Yeola ... 21st December 1909.
- (2) Temple of Gondesvara at Sinnar ... 12th June 1910.
- (3) Hemadpanti temple of Mahadev at Jhodga... 25th October 1909.

I describe briefly below the result of my inspection regarding the buildings.

Item 1.—The caves are in fair order but very dirty. Certain smearing of red paint should be stopped and the Collector of Nāsik has been written to to warn the village officers accordingly. Provision for a chaukidar seems necessary and the same will be made in the C. R. estimate. A sum of Rs. 120 (approximate) as provided for in the list sent to you with this office No. 8158 of 20th October 1909 will be required for repairs to the caves and the same has been included in the present statement.

Item 2.—The temple is in fair order. If there are no funds available for restoration, it is suggested that the scaffolding already erected should be

^{*} Omitted in the Superintending Engineer's list.

removed as it is very unsightly. A sum of Rs. 25 (approximately) will be required for the purpose.

Item 3.—The plinth of the temple requires protection at once as it is made of rough stones which were evidently protected formerly. As they are now unprotected the building is collapsing on the east and shows signs of danger of collapse on the south and east. Three lintels are cracked. The one over the main entrance being badly cracked and it is at present propped up with a wooden post.

This post, I think, ought to be replaced by a stone column which should be of the same design as the other two stone pillars at the entrance.

An estimate for Rs. 4,900 (approximate) for special repairs to the temple is in hand and will be sent in due course.

In addition to the inclusion of above works in the present statement I have included the following two works which remain to be inspected during the current year.

- (1) Pandu Lena Caves.
- (2) Aeshwar temple at Sinnar.

The amount shown against Item (1) is the same as is usually spent on account of maintaining it.

For Aeshwar temple, the amount is the same as has been shown in the statement sent with this office No. 6158, dated 20th October 1909."

- 28. The inspection report by the Executive Engineer, Northern Hyderābād Canals District, to the Superintending Engineer, Indus Left Bank Division, is as follows:—
- "Buddhist Stupa at Thul Mir Rukan.—Inspected by Mr. Tilumal Kubchand, Sub-Engineer, on 3rd January and 8th February 1910. The Stupa is in good state. Repairs were carried out during the last year ending 31st March 1910, which consisted of cement pointing to the platform where necessary and removing kalar eaten bricks.
- "The tomb of Nur Mahomed Kalhora at Kuba, seven miles north-east of Daulatpur in the Moro Taluka.—Inspected by Mr. Tilumal Kubchand, Sub-Engineer, on the 18th April 1909, 2nd December 1909, and 10th January 1910. The tomb is in good state. Repairs, such as chunam plastering walls over roof where the old plaster had peeled off on account of rain, providing "Neel" with new iron bar and providing shed (shade?) for lamps with plaster of Paris, were carried out during the last year ending 31st March 1910."

29. Fifty-one estimates for conservation work in the Circle passed through my hands during the year under report.

- 30. The Executive Engineer, Bijāpur, reporting upon "Scrub Eradicator" as used against tree growth and weeds on buildings on the fort walls at Bijāpur, says:—"The small trees and plants could be destroyed in cases where the eradicator could reach the roots by percolation. In case of larger trees the roots could not be killed completely. The plants withered by the application of the solution but started sprouting again in the course of two weeks to a month. A second or third coating of the eradicator destroyed the new shoots, but failed to kill them altogether. The trees and weeds growing on the side of a vertical wall could not be destroyed as it was found difficult or impossible to use the liquid in such a way as to have it reach the roots of the plants."
- 31. Conservation notes were prepared, printed, and sent in, upon the great Sūrya temple at Mudherā in His Highness the Gāekwād's territory, and upon the old temples at Aihole in the Bijāpur Districts. Others have been prepared, but are not yet printed, upon the old temples at Patṭadakal, Bādāmī, Hāveri, Bankāpur, and those at the Gokāk Falls. Copies of the printed notes are attached for the perusal of Government.

Works proposed for 1910-11.

32. The list of works it is proposed to take in hand during the year Works proposed.

1910-1911 is as follows. They are listed in order of urgency:—

(From Provincial Revenues.)

IV.—BOMBAY NATIVE STATES.

- 33. The Political Agents of Sāvantvādi, Pālanpur, Mahī Kānthā, Cutch, Savantvadi, Palanpur. Mahī Kānthā, Hālar and Gohilwād Prānts, Kāthiā wād, report that no expenditure was incurred in any of the States under their respective Agencies during the year 1909-10.
 - 34. The Rewā Kānthā Political Agent reports that the Rājpiplā Darbār undertook the repairs to the Ghāt near the old Kumbheśvara temple at an outlay of Rs. 442.
- 35. The Political Agent, Kolhāpur and Southern Marāṭhā Country, reports that no conservation work was carried out in any of the States under his Agency during the year ending 31st March 1910.

V.—CENTRAL INDIA.

36. Conservation work was carried out at the Dhamnar caves in Indore territory, in accordance with my notes mentioned in paragraph 36 of my last year's report at an expenditure of Rs. 566. A full illustrated account of these caves is given in the Archæological Survey Annual for 1905-06.

BHOPAL. 37. No repairs of Archæological monuments were carried out by the Bhopāl Darbār.

38. At Māṇḍu repairs were carried out to the following buildings, viz.

the Victory Tower, Hoshāng's tomb, the Jāmi

maejid, the Jahāz Mahāl, Baz Bāhādur's palace, and
the Dāk Bungalow (old tomb); and at Dhār to the Lāt masjid and the Kamāla
Molānā, at a total expenditure of Rs. 827.

REWAH.

39. The report on the conservation work of Archæological interest in the Rewah State is as follows:—

"The work at Piawan was finished during the year 1909-10 in accordance with the proposals of the State, Public Works Department, approved by the Archæological Superintendent, Bombay Circle. The inscription, which is carved on a rock, was covered with an iron box provided with lock and key, one of the keys remaining with a substantial villager who can show the inscription to visitors. The shed of corrugated iron sheet over the inscriptions at Allaghat was finished in August 1909. This proposal also had the approval of the Archæological Superintendent.

2. In addition to the absolutely necessary work in shape of repairs at Piawan, Allaghat and Chandrehi the Darbar propose to carry out preservation work in nine temples at Amarkantak. The proposals of the State Public

Works Department have been entirely approved by the Archæological Super-intendent since the end of the year.

The temples are named as follows:-

- (1) Karan, (2) Mahadeo, (3) Hargowri, (4) Mahadeo, (5) Mahadeo, (6) Mahadeo, (7) Maie, (8) Sone river God, (9) Mahadeo."
- 40. The Political Agent, Bundelkhand, sends the following report regarding the repairs which have been going on at Khajrāhā, received by him from Mr. Manly who is in charge of the works:—
- "Copy of a letter No. A-95, dated the 2nd July 1910, from R. A. Manly, Esquire, in-charge restoration works, Khajraha Temples, to the Political Agent in Bundelkhand.
- "I have the honor to state in reply to your No. 3714—260-10, dated 23rd June 1910, regarding the work done during the year April 1909 to March 1910. I enclose a tabulated statement shewing the amounts spent on the respective temples.
- "Mr. Cousens knows Khajraha as well as Mr. Marshall, and it would aid him a great deal in writing his report if you would kindly send him my report "Work done," "Work to be done," which I submitted at Khajraha with my letter dated 20th February 1910.
- "From that date to the end of March—the work carried on was on No. 5—Devi Jagdamba and No. 6—Chitragupta temples and the museum which, I may venture to say, is nearly finished.
- "The brick-built portion in front of both these temples were dismantled and are being constructed from base to top in stone according to Director-General's instructions; I mention this as Mr. Cousens may not be aware of it.
- "Mr. Cousens has visited Khajraha on 3 occasions and, if he could manage to come, it would be very satisfactory."

Khajraha Temple Restoration Works.

- "Copy of a letter No. nil, dated the 20th February 1910, from R. A. Manly, Esquire, in-charge restoration works, Khajraha temples, to the Political Agent in Bundelkhand.
- "I have the honor to attach two statements with reference to Mr. Marshall's demi-official No. 171, dated 26th January 1910, shewing what has been done and what remains to be done to Khajraha temples. The only temples which have been finished are Vaman No. 17, Jawari No. 18, and Ghutai No. 21, but all of them should be stained.
- "In conclusion I beg to state that there is a very short time left for the beginning of the monsoons and, as I will have to arrange for material which will be needed for the progress of the work till November, I should like to know what the allotment for 1910-1911 is to be. Early intimation about this will oblige.

Work that has been done.

"Museum, with the exception of a small portion which I hope to finish in course of about a month, is finished.

Vaman Temple No. 17.—Finished.

No. 18-Jawari.-Finished.

No. 21-Ghantai.-Finished.

No. 30-Duladeo Temple-

Retaining wall finished.

Scaffolding put up and shored up with Kacha Pacca brick masonry. Stone and mortar collected.

No. Jatkari Temple-

Retaining wall finished.

Scaffolding put up and shored up with Kacha Pacca brick masonry Stone and mortar collected.

Work that has been done.

- "No. 3—Khandaria Temple.—Everything as noted in printed instructions has been done except that mentioned in statement "Work to be done."
- "No. 5—Devi Jagdamba Temple.—Everything as noted in printed instructions has been done except that mentioned in statement "Work to be done."
- "No. 6—Chitragupta Temple.—Everything as noted in printed instructions has been done except that mentioned in statement "Work to be done."
- "No. 7—Vishvanath Temple.—Everything as noted in printed instructions has been done except that mentioned in statement "Work to be done."
- "No. 10—Chaturbhuj.—Everything as noted in printed instructions has been done except that mentioned in statement "Work to be done."

(Signed) R. A. MANLY.

do.

Statement of work to be done to Khajraha Temples.

" No. 3-Khandaria Temple-

- 1. North-west balcony pillar to be removed and 5 angle iron to be inserted on either side of broken beam.
- 2. Brick masonry pillar under slab to be removed.
- 3. South balcony brick work to be removed and stone pillars to be put at sides with T-iron under slab.
- 4. North-east balcony do. do.
- 5. North-east porch T-iron under slab.
- 6. Pyramid tops to niches inside temple (work in progress).
- 7. Pyramid tops to niches outside.

" No. 5-Devi Jagdamba Temple-

- 1. South balcony side stone pillar with T-iron to support broken slab.
- 2. North balcony do. do. do.
- 3. South balcony stone beam broken, iron to be put on either side of the beam.
- 4. The brick structure at entrance to temple has been dismantled according to Mr. Marshall's instructions of July 1909. Stone structure in progress.

" No. 6-Chitragupta Temple-

- 1. The front structure of brick masonry dismantled. Stone structure in progress.
- 2. North and south balcony slabs broken, T-iron support under with side pillars.
- 3. North balcony parapet in black stone.

" No. 7-Vishvanath Temple-

- 1. The pillar of the west balcony south corner is cracked obliquely and is in a dangerous condition; the stone beam is also broken in the centre; it has a stone support under the crack; this is quite useless, if the corner pillar should collapse; the corner pillar to be replaced with a new one and 5 inch angle iron to be fitted on either side of beam that is broken.
- 2. South-west balcony stone beam broken, angle iron to be fitted on either side of beam.
- 3. South-east and south-west balcony slabs broken, T-iron to be put under slab with side pillars.
- 4. Steps to entrance to shrine to be replaced in stone brick, and plaster removed.
- 5. A number of cornice and parapet stones which are ready to be fixed in position.

"No. 10-Chaturbhuj Temple-

- 1. South-west balcony beam broken, brick pillar to be removed and beam to be supported with angle iron on both its sides.
- 2. South balcony north-west and north-east balcony slabs broken, T-iron to be put with stone pillars under.
- 3. Small temple on the east south corner of temple platform is out of plumb. The base is to be wedged with stone and iron wedges driven in under plinth. Moulding to be re-built and base to be concreted.

" No. 21—Ghantai Temple—

Two base stones on either side to be replaced with new blocks and roof to be copper tied as per instructions of the Director-General—July 1909.

" No. 22-Adinath Temple-

The brick porch has not been dismantled as the temple is in possession of Jain community. The Darbar must move in the matter before I can take it in hand.

" No. 30-Duladeo and Jatkari Temples-

I need not revise the condition in which both these temples are, and, as both yourself and Mr. Marshall have inspected them, practically no restoration work has been taken up. See notes work done."

Restoration of Shikar and tops of temples above cornice.

"All the tops of the temples from cornice upwards to be thoroughly examined and all shaking portions to be wedged with cement and stone and clamped with copper if necessary. All prominent kalsas to be replaced where missing, all loose ones to be fixed with stone pins and cement. This applies to temples Nos. 3, 5, 6, 7 and 10. This is very essential as all the damage caused in

the past to the cornices and parapets has been owing to the upper portion falling, in fact monkeys have a great deal to do with the damage that was done.

Removal of grass and shrubs-

- "All gaps where vegetation is apparent should be cleaned carefully and filled up with cement and old plaster while washed; old mortar joints cleaning intervenes, etc., etc., is to be alluded to also. Please see general instructions, 2nd January 1905, by H. Cousens, Esquire.
 - " Museum-
 - 1. Collection of sculptures.
- 2. A small portion of centre platform remains to be finished. Coping and kalsas to be fixed."

(Signed) R. A. MANLY.

VI.—RAJPUTANA.

- 41. The returns for Dungarpur, Banswara, Partabgarh, Kushalgarh, and Mewar, for 1908-09 arrived too late for inclusion in last year's report; they are, with the exception of Mewar, blank.
 - MEWAR. 42. In Mewar the only work mentioned is the repairs to the Chitor fort.
 - 43. The return for Jaipur, which was also late, records that the Darbār have sanctioned a sum of Rs. 11,364, in order to restore their old observatory, situated at Jaisinghpurā near Delhi.

MARWAR, DHOLPUR, KARAULI, KISHANDARH, ALWAR, BUNDI, TONK, SHAHPURA, DONDARPUR, PARTABDARH, KUSHAL-GARH, JAIPUR.

- 44. The returns for 1909-10 for the following States are blank, viz., Mārwār, Pholpur, Karauli, Kishangarh, Alwar, Bundi, Tonk, Shāhpurā, Pongargarh, Partābpur, Kushalgarh and Jaipur.
- JAISALMER. 45. A temple on the border of the Gharisar tank, at Jaisalmer, was repaired.
- 46. In Bikaner State the repairs of the old fort of Hanumangarh were continued. Repairs were also carried out to the Goga, Medi and Karniji's temples.
 - KOTAH. 47. Repairs were done to the chattris in the Sar Bagh, the burning ground of the Maharaos of Kotah.
- 48. Some attention in the way of repairs was given to the old temple at the so-called site of Chandravatī near Jhālrā-pāṭaṇ.
- 49. The Bharatpur State carried out conservation work in the old Jāmi masjid at Byānā.
- 50. In Ajmer-Merwarā the repairs were completed to the Bādshāhi buildings in Nayā Bāzār at Ajmer, and repairs were made to Abdullah Khān and his wife's tombs.
- 51. The repairs to the famous marble temples of Mt. Abū are progressing favourably, though slow. They are now mostly minor mendings. The Sirohī Darbār have ordered certain repairs to be carried out to the three stone buffaloes at Achaleśvara on Mt. Abū, notes for which I sent in through the Honourable the Agent to the Governor General.

VII.—HYDERABAD, DECCAN.

- 52. The following brief note on the conservation of Ancient Monuments in His Highness the Nizām's Government has been sent in by the second Assistant Resident:—
- "The general repairs to the Bibi Mukhbara were undertaken at a cost of Rs. 5,000 during the year 1318 Fasli. Repairs to two minarets of the Mukhbara were started in 1318 Fasli, on a sanctioned estimate amounting to Rs. 10,205 and

repairs to one minaret were completed in the same year, the expenditure incurred being Rs. 5,000; the other will be completed during the current year 1319 Fasli. The supervision of the works was entrusted to a committee consisting of the Subedar of the Aurangabad Subah, the Superintending Engineer, General Branch, and the Director of Public Instruction. The work was carried out under the direction of the District Engineer, Aurangabad. In addition to the above special repairs, a sum of Rs. 1,000 is annually granted for general repairs and maintenance.

On receipt of the Government of India Resolution of 1908 touching the archæological remains and their conservation, general instructions were issued to the District Officers to prepare estimates for the restoration of works of all ancient monuments worth preservation. For preservation of Ellora Caves an estimate amounting to Rs. 6,329 has been sanctioned by His Highness the Nizam's Government, and the work is now in progress. There is an annual maintenance grant of Rs. 400 for the upkeep of the caves.

Doulatabad Tower of Vistory.

Doulatabad Tower of Vistory.

Doulatabad Tower of Vistory.

Doulatabad Tower of Vistory.

The minaret has three main balconies, one at a height of 98 feet from the basement, the second 50 feet above the first and the third 42 feet above the second. The lowest one is built of stone and is intact. The upper two were built of wood, but both have rotted away and mar the appearance of the structure. It is now proposed to repair the top dome which has cracked vertically. When the repairs are carried out the appearance of the monument will be much improved. The work is now in progress and the full budget allotment of Rs. 4,000 has already been expended.

An estimate of Rs. 19,637 was prepared and submitted by the District Engineer for preservation work, but it was decided by Government that the needed repairs should be carried out by the Estate of the Nawab Salar Jung in whose Jageer the caves are situated. Nawab Salar Jung Bahadur has informed the P. W. Secretary that he is commencing work now.

A sum of Rs. 5,000 has been sanctioned for the general repairs to the mosque and the work is in hand, and will be completed during the year. In addition to the above, a sum of Rs. 300 has been sanctioned as an annual maintenance grant.

When the Superintending Engineer visited the town of Shorapore in the year 1909, on inspection duty, he had occasion to visit the old palace of the Rajah. The building is a two storeyed one, but the upper storey is more important from an archæological point of view. The flooring is all of Massic (sic. Mosaic?) tiles of various rich patterns, the roof has a ceiling of glazed earthenware tiles rarely met in any part of India, and the covering pot-tiles are also glazed, and are a curiosity. The building has been included in the list of Archæological Remains in the Hyderabad State, and will be preserved.

Instructions have been received from the Financial Department to preserve this temple. The District Engineer, Warangal, has been asked to prepare an estimate in consultation with the Subedar Sahib and to provide funds in the budget for 1320 Fasli."

VIII.—PROTECTED MONUMENTS.

53. Further substantial progress has been made under this head during the year under report. The following is a list of monuments declared "Protected" by Government and confirmed after the prescribed notice under section 3 (2) of the Ancient Monuments Preservation Act VII of 1904 had been duly exhibited (see Government Resolutions Nos. 2704 of 26-5-09, 3285 of 26-6-09

(confirmed in No. 1791 of 16-4-10); 3748 of 22-7-09, 4343 of 17-8-09 (confirmed in No. 2907 of 21-6-10); 4740 of 8-9-09 (confirmed in No. 1327 of 17-3-10); 5672 of 2-11-09 (confirmed in No. 1365 of 19-3-10) and 2244 of 12-5-10, General Department):—

IX.—EXCAVATION.

- the north of the town, about half a mile or more, is an area of land, of about 30 acres, which is covered with great brick mounds, the remains of some buildings which once existed here. These have been terribly harried by railway contractors and others, so that they are now without shape or form. But, at the northern end, stood one large mound, which, on examination, was found to be the stump of a large Buddhist stūpa. Excavation work was confined almost entirely to this, with the result that the lower parts of the walls were unearthed and the relic chamber and relics were found. These are described in Part II of this Report, and will be illustrated and described more fully in the Archæological Survey Annual.
- a hill, upon the top of which had been a stūpa and the foundations of some old buildings. The stūpa had been dug into by a Mr. Cole, fifty-seven years ago, and some of the sculptured bricks had been sent to the Museum of the Bombay Branch of the Royal Asiatic Society, where they still are. I did a little excavation into what is left of the foundation of the stūpa, in order to ascertain whether Mr. Cole had reached the bottom or not. This he appears to have done, for nothing further was found.

X.—ORIGINAL EXPLORATION.

- 56. Original exploration was to some extent carried out at Pattadakal and Bijapur. Badami Bādāmī, where, although these places were formerly visited and surveyed by us, a few more points of interest were brought to light. These places were visited primarily with regard to certain proposed conservation measures to be applied to the old temples.
- 57. But the principal exploration of the year was that of the stūpa at Mīrpūr-Khās in Sind, described in Part II. Beside this, other stūpa sites were explored near Tando Muhammad Khān and Jherrick.
- 58. Mr. Bhandarkar's work in Rājputānā, as described in Part II of this Report, was, of course, wholly original exploration, and each succeeding season's touring brings to light very much more of interest, and shows how rich the province is in archæological remains.
- 59. From a spot in the river bed, some 20 miles west of Poona, Mr. G. F. Keatinge, I. C. S., collected a quantity of prehistoric flint celts which he sent to the British Museum for inspection, where they were accepted as such. This locality might be further examined. Intimation of the find reached me too late to do anything last season.

XI.—EPIGRAPHY.

60. The last season was not very fruitful for epigraphic work.* Still some inscriptions were found which were not without interest or importance. The first that deserves to be noticed was found at Chatsu, 26 miles south of Jaipur. It gives an account of an entirely new Guhila dynasty not previously known to us from other records. Curiously enough, although the word samvat is engraved at the end, the actual date has been left out. Still to judge from the form of its letters it cannot be later than the tenth century. It records the erection of a temple of Murari by the Guhila king Baladitya in commemoration of his dead queen Raṭṭavā, daughter of the Chāhamāna Sivarāja. At Jiṇ-mātā, in the Sekhāvāṭī province of the Jaipur State, some short inscriptions are incised on the lower parts of the shafts of pillars in the sabhāmandapa of the temple. They are important for the early history of the imperial Chāhamāna dynasty, as they supply the dates 1162 and 1196 V. E. for Prithvirāja I and Arņorāja respectively, not furnished previously by any inscriptions. But the earliest inscription of the last season was found at Sakrāi, not far from Jin-mātā. The date is samvat 879 dvir-Āshādha sudi, and the inscription records the rebuilding of a mandapa by certain merchants in front of the goddess Sankarā, who is now called Sakambharī. A fourth inscription that requires perhaps a passing notice was found at Pushkar, and has now been removed to the Ajmer Museum. It is dated samvat 982 Magha sudi ekādaśyām, and refers itself at the end to the reign of one Durgaraja.

XII.—NUMISMATICS.

- 61. During the year, 380 coins in gold, silver, and copper were received for decipherment, of which 12 were sent by the Political Agent, Koṭāh, 24 by the Rewāh Darbār, 95 by the Revenue Minister, Bhopāl, and 249 by the Honourable the Agent to the Governor General in Central India. Of the last 225 were sent not only for decipherment but also for distribution to the museums on the distribution list.
- 62. From the Mîrpūr-Khās stūpa, which was excavated, 46 copper coins were obtained. They were all in a very bad state of corrosion, and I almost despaired of finding any nucleus of copper at all. I tried to clean some by Krefting's method as explained in *The Preservation of Antiquities*, but I

^{*} This note on Epigraphy has been prepared by Mr. D. R. Bhandarkar.

found that my own method worked best and gave better results. I treated them with a dilute solution of sulphuric acid. I was thus enabled to get a copper nucleus out of all. Ten of the coins were within the $st\bar{u}pa$, in the relic coffer, and these lumps of corrosion yielded small rectangular thick lumps of copper, but the corrosion had obliterated all definite markings from the surfaces. From the size, shape, and a few suspicious marks upon them, I think it likely they were punch-marked coins. The 36 coins found with the votive tablets outside the $st\bar{u}pa$ altogether, on the west, turned out to be Arab coins such as were introduced by the Arabs when they first entered Sind in the 8th century. They are thin and round, and some have portions of the Arābic inscriptions upon them.

63. I must take this opportunity to record my gratitude to the Rev. Dr. George Taylor of Ahmedābād, whose kindness I have experienced on many occasions in the matter of help in deciphering Muhammadan coins. He has ever been most ready and willing to devote much of his valuable time to numismatic research, and his able papers in the various journals testify to an intimate and thorough knowledge of his particular branches of the subject.

Treasure Trove.

64. In connection with the distribution of coins acquired by Government under the Treasure Trove Act and forwarded to the Bombay Branch of the Royal Asiatic Society for that purpose, the Honorary Secretary reports as follows:—

"The number of coins examined and reported on under the Treasure Trove Act during the year ending July 1910 was 739. Of these, 159 were received from the Collector of Sholapur, 4 from the Collector of Kolaba, 234 from the Collector of Satara, 200 from the Collector of Bijapur, 141 from the Collector of East Khandesh and 1 from the Collector of Ahmednagar. Out of these, 421 were selected and recommended for distribution among coin cabinets and for sale at the Mint; 48 from Sholapur, 4 from Kolaba, 124 from Satara, 103 from Bijapur, 141 from East Khandesh and 1 from Ahmednagar. The coins from Sholapur and Bijapur are the same as those referred to in the last year's report as being recommended for acquisition and the classification and distribution of which, it was stated, would be specified in the present report. The remaining 318 which on examination were found to be defaced or of no interest to the numismatist were returned; 110 to the Collector of Satara, 111 to the Collector of Sholapur and 97 to the Collector of Bijapur.

"The classification of the selected coins by metal and by the series to which they belong is as follows:—

			Gold.	Silver.	Copper.	Tutenag (alloy of tin and lead).	Total.
	Kings of Vijayanaga	r	39		•••	•••	39

- "Besides these, 44 silver coins have been received from the Collector of Larkana. Out of these, 24 which are coins of the Kings of the Durrani dynasty and 16 of the Moghul Emperor Muhammad Shah have been selected but they are awaiting final disposal pending their legal acquisition by the Collector, which will be noticed in the next year's report; 4 specimens being defaced and the inscription on them not being legible have been returned to the Collector.
- "A very important find occurred in the Satara District. It comprises 88 gold coins discovered at Sakurdi in the Karad Taluka of that district which are rare and of historical interest. They are coins of the Yadavas of Devagiri about the 11th to 14th century A. D. The coins are of two varieties. Those of one variety have in the centre a figure which Mr. H. Cousens and Mr. D. R. Bhandarkar have identified as the monkey god Hanuman. Specimens of this variety were referred to them, there being some doubt in regard to the correct identification of the central figure. The pieces of the 2nd variety have a number of dots in the centre supposed to represent a rude lion (?). There are letters in Nagari on coins of the first variety of fits (Shri Simha) on some specimens and of seal (Shri Lakshmi) on the others. Specimens of both the varieties have besides other punch marks stamped on them.
- "Hanuman was a family crest of the Yadava and Simha was but another name of Singhana, a Yadava King. Shri Lakshmi stands perhaps for Lakshmipala, a Governor of Singhana.
- "Two Indo-Portuguese coins from Alibag, Kolaba District, known as the Rodas of Tutenag (an alloy of tin and lead) though not of great antiquity are of some interest on account of their rarity. These coins minted by the Portuguese at Goa and Div are the lowest in value of all the coins issued by them in India. They are called Rodas (Roda a wheel) from bearing on the obverse a wheel of St. Catharine the Patron Saint of Goa.
- "The coins of Native States received from Bijapur, though not of any special numismatic value, are interesting on account of their different varieties.
 - "Some have the symbol of Ankush (elephant goad).
- "A Standard under the Peishwas was called the Ankushi Rupee from the symbol of Ankush on the coin. This rupee was current throughout the Deccan and the Konkan during the rule of the Peishwas.
- "Some have the letter \vec{n} and \vec{n} (ga and go) on the obverse with Hijri dates 1186 and 1240 (1772 and 1824 A. D.).

- "The letter of is on some coins and the year 1819 in English figures on the others. All the varieties bear the usual fragments of Persian inscription on obverse and reverse.
- "Among the other coins may be mentioned the gold coins of two kings of the Vijayanagar dynasty, Deva Raya (1401 to 1451 A. D.) and Achyuta Raya (1530-42 A. D.) found at Vagholi in the Barsi Taluka, Sholapur District. Most of the specimens are in good condition.
- "The coins of Deva Raya have on the obverse the sitting figure of a god and goddess, probably Shiva and Parvati, with the sun and moon over head and a Nagari legend on the reverse:—(1)Shri Pra-(2)tāpadeva-(3)rāya; while the coins of Achyuta Raya represent on the obverse a double-headed eagle monster holding up a small elephant in each beak and in each claw; the legend on the reverse exhibits in Nagari, the name (1)Shri Pra-(2)tāpāchyuta-(3)rāya (imperfect) on most specimens). The two-headed fabulous bird is known in Southern India as Ganda bherunda."
 - 65. In a field assigned for public purposes in the village of Chalodā, tālukā Pholkā of the Ahmedābād District, was found, on the 22nd May 1909, treasure consisting of 52 Sakāī rupees.
- 66. At Walad, a village in the Daskrohi tālukā of the same district, was found, near the bank of the Sābarmatī, on the 5th August 1909, treasure consisting of 31 old silver coins called kories.
- 67. On the 18th January 1909, treasure consisting of cash, Rs. 64, a golden Powchi, a pair of silver goth, and a brass pelā was found while digging the old foundation of his house by a Mahār named Rāmā valad Bhuram of Ghorpadi Zagdīychī Vādī. It is of no archæological interest.
- 68. Certain labourers while digging the ground belonging to the Pāṭil of Dohori, tālukā Jāmner, East Khāndesh District, found, on the 7th May 1909, 20 Chāndvadī rupees and a coin equal to half a Chāndvadī rupee.
- 69. Hidden in an earthen pot, buried in the wall of a dilapidated temple of Vithobā, belonging to Vithal valad Ganga Golsare, of the village of Kundevādī, tālukā Sinnar of the Nāśik District, was found, on or about the 25th April 1909, the sum of Rs. 53-8-0 (consisting of 2 old Muhammadan rupees and all the rest of British mintage—Rs. 5 of 1835, Rs. 32-8-0 of 1840, Rs. 6 of 1890 and the rest Rs. 8 of different years from 1890.
- 70. On or about the 1st July 1909, treasure consisting of one $tod\bar{a}$ of silver and 10 big links weighing $172\frac{1}{2}$ tolās and other of the same metal having 9 small links weighing $52\frac{1}{2}$ tolās and 3 small pieces of silver of about annas 10 in weight, was found in Survey No. 77 of the village Virane, tālukā Mālegāon of the same district. It is of no interest archæologically.
- 71. A find, consisting of 44 silver coins, viz., 13 coins of the time of Shāh Shujahal Malak, 16 of Muhammad Shāh, 3 of Mahmud Shāh, and 12 not recognizable, was made on the 24th February 1909 by certain boys from the old village site of Maraphpur, in the Dādū tālukā of the Lārkhānā District.
- 72. The Political Agent, Rewā-Kānthā, forwarded a letter from the Kārbhāri of the Lunāvādā State, dated the 5th June 1909, in which he said "a number of silver coins were found at a village called Chhogālā. Four of these coins were sent to the Secretary to the Trustees of the Indian Museum, Natural History Section, Calcutta. The report received from this officer shows that they belonged to the mediæval age."
- 73. In Survey No. 163 known as "Kumbhar Hola" of the village Ingali, in the Hukeri tālukā of the Belgaum District, were found, on the 15th July 1909, 10 gold and silver ornaments, but of no archæological interest.

- 74. In the same district, in the village of Majalhatti of the Chikodi tālukā was found, on the 15th July 1909, treasure consisting of 4 gold and silver ornaments but of no interest archæologically.
 - 75. On the 17th May 1909, treasure consisting of Rs. 18 was found in an earthen pot buried in the "Gabhan" of Kalyānsang Partāp in the village of Pakhajan, tālukā Vāgrā, of the Broach District.

XIII.—MUSEUMS.

- 76. Progress with the Prince of Wales Museum, Bombay, is slow. The basement walls are now a few feet above ground. A Board of Trustees has been constituted. In addition to the collection gathered together for the museum, and mentioned in my last progress report, two wooden panels containing old Portuguese figure sculpture have been secured, and are at present in the custody of the Collector of Thāṇā.
- 77. During the year 1909 the Bombay Branch of the Royal Asiatic Society's Museum received the following addition to their coin cabinet. The number of coins added to the museum was 77, of which 4 were gold, 54 silver, 18 copper and 1 of mixed metal, silver and copper. Of the total 77, 13 were presented by the Collector of Panch Mahāls, 12 by the Jabnā Darbār, through the Political Agent, Bhopawār, 1 by the Agent to the Governor-General in Central India and 1 by Miss Chubb. The rest were presentations to the Society under the Treasure Trove Act from the Governments of Bombay, Madras, the Punjāb, the United Provinces, the Central Provinces and Eastern Bengal and Āssām.
- 78. The Victoria and Albert Museum, Bombay, has had the misfortune to lose its gold coin collection by theft, and the thief is as yet at large. During the year ending 31st March 1910, two Hindu Mythological figures and one stone image of an old warrior were added to the collection from the Māmlatdār of Roņ.
- 79. During the year 1909-10 the Poona Archæological Museum, in my charge, has been enriched by the following coins received as presents under the Treasure Trove Act and purchased, viz., 20 gold, 68 silver, 298 copper and 5 lead coins. It also received from the excavations carried out at the Buddhist stūpa at Mīrpūr-Khās, Sind, 5 big terra-cotta Buddha images (one being headless), 1 small Buddha image, 1 image, possibly of the prince who provided the money for building the stūpa, 56 clay votive tablets, one stone coffer which held the relics, 2 small earthern pots placed on either side of the coffer, 46 copper coins very much corroded (since cleaned) and a quantity of sculptured bricks, 6 plaster casts from old sculptured bricks, and 11 old water colour paintings. Since the close of the official year we received from Mr. W. Burns, Agricultural Department, 21 copper coins dug up at Bassein, among them being old Indo-Portuguese, old Bombay, and Marāthā coins, together with a small metal statuette.
- So. The curator of the Junagadh Museum reports that it contains a rare and very interesting collection of antiquities such as the relics of Buddha, discovered from the Boria stupa in 1889 A. D., the old silver coins of the Kshatrapa king Nahapāna and other kings of the same dynasty, silver and copper coins of the Gupta dynasty and of others. The copper plate inscriptions of the Valabhi King Dharasena II dated 571 A. D., of Shilāditya or Dharmāditya dated 605 A. D., and of Balavarma and Avanivarma dated 893 and 900 A. D. respectively and some memorial stones of 1413 A. D.

A fragment of the stone inscription in old Sanskrit, of Rudrasimha the son of Kshatrapa King Jivadam dated (the saka year) 228, Vaishakha Shud 7 corresponding to 306 A. D. discovered at the digging carried on in connection with the Shahpore-Kutiyana Railway near Vanthali, the ancient Vamanasthali under the State.

It may be mentioned that a collection of old silver coins of thick size and commonly called "Gadhaiyas" bearing no legend or date, and one or two gold coins of one of the Sultans of Gujarat, were reported to have been discovered from the Dharagadh-Yardev of traditional fame situate just outside the Junagadh city at its north-east corner and probably occupying a portion of the bed of the once well-known lake Sudarsana.

- 81. The Watson Museum of Antiquities at Rājkot acquired, during the year under report, 4 additional rubbings of copper plates found at Timāṇā, Porbandar and Morvī, and various copper coins old as well as new but of no special interest. Among them there is one silver coin—Ral—weighing two tolās and a quarter with eagles on both sides.
 - Baroda. 82. The Baroda State Museum reports no additions of archæological interest during the year.
 - 83. The Honorary Secretary of the Barton Museum, Bhāvnagar, reports that no important acquisition has been made in the antiquarian section of the museum during the year 1909-10.

Udaipur.

84. No additions have been made to the Victoria Jubilee Hall Museum, Udaipur.

XIV.—COMPILATION OF LISTS.

- 85. Mr. D. R. Bhāndārkar's touring with the object of gathering material for the lists of antiquarian remains in Rājputānā was continued last season. An account of his discoveries is given in Part II of this Report.
- 86. Mr. C. W. M. Hudson's revision of the Bombay lists, so far as they refer to his district of Dhārwār, has been steadily Bombay. prosecuted, and a great many new entries have been added, while some old ones have been amended. In addition to the gentlemen mentioned in my last Progress Report as having assisted him in this work, we are indebted to the following for similar help, and, through the Collector, we tender them our best thanks for their valuable lists-Mr. Hudson's Chitnis, Messrs. Mangesh S. Kumta, Rāmrāo S. Dhārwārkar, Māmlatdār of Navalgund, Venkanna Naik, S. V. Sidenur, Mamlatdar of Ron, M. R. Harpanhalli, Mahalkari of Mundargi, B. Shirolkar, Acting Māmlatdar of Karajgi, G. V. Masur, Māmlatdar of Hangal, and R. G. Rayadurg, Mamlatdar of Gadag. Rão Saheb Venkatesh Shrinivas Naik of Ranebennur, whose help I had the pleasure of acknowledging in my last report, has sent in a further list of inscribed slabs, accompanied by small drawings of each, which will make the future identification of these records comparatively easy. I again thank him sincerely for his assistance.

XV.—PUBLICATIONS.

- 87. Beyond our annual progress report for 1908-09 no separate publication has been issued by us. I contributed articles upon the ancient temples at Aihole, and an old painting of the late Colonel Tod, the Author of Annals and Antiquities of Rājasthāna, to the Archæological Survey Annual.
- 88. Mr. Bhāndārkar published the following papers:—On the Chaumukha temple at Rānpur in the Archæological Survey Annual, and Epigraphic notes in the Journal of the Bombay Branch of the Royal Asiatic Society, and Āṭpur inscription of Śaktikumāra to the Indian Antiquary.

XVI.—CONTRAVENTION OF STANDING ORDERS.

89. Again, I am glad to say I have nothing to report under this head for the last year.

XVII.—OFFICE LIBRARY.

90. The office library was increased during the year by the following works:—

Catalogue of the Indian Coins in the British Museum, Andhra and Kshatrapas (1908).

Catalogue of Coins in the Phayre Provincial Museum, Rangoon.

Imperial Library Catalogue, Index Part II.

Records, Vol. No. 2 from the Canterbury Museum, Christ Church, New Zealand.

Lieutenant-Colonel G. F. W. Braide's Pamphlet on the use of the Quinine as at Prophylactic against Malaria in the Punjab.

Descriptive Catalogue of Sanskrit Manuscripts in the Library of the Sanskrit College, Calcutta, No. 26.

Descriptive Catalogue of Sanskrit Manuscripts in the Government Oriental Manuscripts Library, Madras, Vol. 6, Dharmaśātra.

Mysore and Coorg from the Inscriptions, by B. L. Rice.

List of Archæological Reports published under the authority of the Secretary of State for India.

Bulletin No. 41, Bureau of American Ethnology.

Bulletin No. 42, Bureau of American Ethnology.

Archæological Survey Report of the Director-General of Archæology in India, Part I for 1907-08.

Archæological Survey Annual for 1906-07.

Annual Progress Report of the Assistant Archæological Superintendent for Epigraphy, Southern Circle, for the year 1908-09.

Annual Progress Report of the Superintendent, Archæological Survey, Eastern Circle, for the year 1907-08.

Annual Progress Report of the Superintendent, Archæological Survey, Eastern Circle, for the year 1908-09.

Annual Progress Report of the Superintendent Archæological Survey, Frontier Circle, for the year 1908-09.

Annual Progress Report of the Superintendent, Archeological Survey, Northern Circle, for the year 1908-09.

Report on the Coins dealt with under the Treasure Trove Act during 1908-09 in the Central Provinces.

Inscriptions Sanskrites de Campa et du Cambodge.

Inscriptions Italiac Mediac Dialectical Edidit Jahannes Zvataieff.

Storia do Mogor, in 4 Volumes.

List of Photo Negatives of Indian Antiquities in the Collection of the Indian Museum, Calcutta, with which is incorporated the list of similar negatives.

Annual Report (1906-07 in Gujarāti) of the Watson Museum of Antiquities, Rājkot.

Annual Report (1907-08 in Gujarāti) of the Watson Museum of Antiquities, Rājkot.

Annual Report (1908-09 in Gujarāti) of the Watson Museum of Antiquities, Rājkot.

List of Europeans and others in the English Factories in Bengal at the time of the Seige of Calcutta in the year 1756.

Old Fort William and the Black Hole.

Early Records of British India.

The Languages of India.

The Hymns of the Rigreda in the Samhitā text by F. Max Muller.

The Hymns of the Rigreda in the Pada text.

Catalogue of Persian Manuscripts in the Library of the India Office.

Alphabetical Catalogue of the Moghul Coins in the Central Museum, Nagpur, Central Provinces.

Imperial Gazetteer of India, Bombay Presidency, Vol. I.

Imperial Gazetteer of India, Bombay Presidency, Vol. II.

Gazetteer of the Province of Sind, Volume A.

Annual Report of the Working of the Rajputana Museum, Ajmer, for the year 1908-09.

The Tomb of Akbar.

Pallava Architecture by Rea.

Memoirs of Jahangir.

Historical Landmarks of the Deccan by Haig.

Ruins of Mandu.

Indian Antiquary, current numbers.

Oriental Bibliography, Volume XXI, Parts II and III.

Oriental Bibliography, Volume XXII, Part I.

Quarterly Lists of the Gazetted Officers in the Archæological Survey Department. Bombay Quarterly Civil Lists.

XVIII.—ANNUAL EXPENDITURE.

91. The expenditure of the Western Circle of the Archæological Survey of India for the year 1909-10 amounted to Rs. 25,369-0-2. The details are:—

			Tota		25,369	0	2
Continger	ncies inc	luding exce	vation	•••	2,788	2	7
Travelling	g allowa	nces	•••	***	3,464		
Salaries	***	•••	***	•••	19,116	8	10
					Rs.	a.	p.

XIX.-PROGRAMME FOR 1910-11.

- Superintendent's tour. that time I shall have retired, and my successor will be a stranger to the Presidency and its monuments. Without some personal knowledge of the latter, and the larger conservation works in progress, he will hardly be able to advise upon the proposals for repairs that may be received. I would, therefore, recommend that he should at once visit the larger centres of archæological remains and conservation work, and get himself acquainted, as soon as possible, with what there is and what is going on. I would also advise his doing some more excavation work in Sind, especially upon the Buddhist stūpa near Tando Muhammad Khān and Depar Ghāngro. If Government approve of this, he could draw up a more detailed programme and submit it after we have talked matters over together.
- 93. Mr. Bhāndārkar will follow up his last season's work from where he left off, and continue visiting places in the Jodhpur Kishangarh, and Jaipur States. Some of the more important places known to possess antiquarian remains are Asarlāī, Chāwaṇḍiā, Pichyāk, Baḍlu, Nagar, Āmvā, and Kakoḍiā.

HENRY COUSENS.

Superintendent, Archæological Survey,

Poona, 12th July 1910.

Western Circle.

PART II.

- 1b.*

 94. The most interesting and important work of the Circle, during the last touring season, was the excavation of the Buddhist stūpa at Mīrpūr-Khās, near Hyderabad (Sind). The following account of this was sent to Government at the time. Read my last Progress Report (for the year ending 31st March 1909), paragraphs 131-135. For "ten acres" in 131 read "thirty acres."
 - 95. I arrived at Mīrpūr-Khās on the 19th January 1910, but found that our office kit, which had been sent vid Karāchi, had Mirpur-Khas. not turned up. It came, however, on the 21st. As soon as I could arrange for coolies I started digging at the stūpa. As the mound was practically without shape or form, save that the central core of sun-dried bricks, rising above the rest, roughly indicated the middle of the stupa, I drove trenches in towards the centre from the ground level on the outer margin of the slope on the south and east. This was to try and strike the edge of the pakkā brick basement of the stūpa, if such existed within the mound. I had only just started this when I had to obey a summons to visit Māṇḍu in Central India in connection with the conservation work going on there. It was the 2nd February when I returned to Mirpūr-Khās. away, I left my men in charge of the digging. On my return I found they had struck solid brick-work in both cuttings, and, upon following the edge of this, I found it to be a square foundation. It was not long before we located and unearthed the S.-E., S.-W., and N.-W. corners. But, before finding these corners, I had directed a cutting from a higher level upon the south side into the centre of the mound as nearly as I could guess it. On finding the corners of the foundation I was able to locate the centre with greater confidence (Photo. No. 3428).
 - 96. Down through the centre, a well, about 10 feet in diameter, was sunk; while, at the same time, further opening up of the brick basement was being made. This well was sunk in the hope of coming upon a relic chamber in the heart of the stūpa; but of this I was somewhat doubtful, since it was recorded that Mr. J. Gibbs, in 1859, excavated the base of a brick thūl at this place, and found a vase of fine earthenware containing some pieces of crystal and amethyst. But then, again, I considered that, if this had been a relic casket, he would have had something more to say about it, and so I settled down to find out for myself by going to the bottom of the mound.
 - 97. I began also to clear the débris around this core of kachā brick-work, in which I expected to find some of the fallen carved and decorated brick-work from the upper walls that had been destroyed, and succeeded in unearthing many fine fragments displaying an endless variety of designs in Greek fret, delicate scroll work, grotesque faces and figures, lotus leaf mouldings, figure medallions, chequer work, basket patterns, etc. (Photo. No. 3456).
 - 98. While at this work on the south side of the mound, the diggers, working near the surface, rolled away a fine head of a Buddha, and, upon examining the spot, I found it belonged to an image which was buried just below the level of the rough platform upon which they were working. Clearing the earth and brick debris from around this image, it was seen that it

^{*} Classification of monuments for conservation purposes is as follows:—

I.—Those monuments which from their present condition and historical or archaeological value ought to be maintained in permanent good repair.

II.—Those monuments which it is now only possible or desirable to save from further decay by such minor measures as the eradication of vegetation, the exclusion of water from the walls, and the like.

III.—Those monuments which from their advanced stage of decay or comparative unimportance it is impossible or unnecessary to preserve.

The monuments in classes I and II are further sub-divided, thus—

I (a) and II (a).—Monuments in the possession or charge of Government or in respect of which Government must undertake the cost of all measures of conservation.

I (b) and II (b).—Monuments in the possession or charge of private bodies or individuals.

occupied a niche in a ruined wall running east and west and facing south. I then examined the edge of this platform, upon the north side, and soon found the tops of some of the pilasters of the same wall on this side. I had thus found the edges of the remains of the walls of the great square basement upon which the round tower of the $st\bar{u}pa$ stood, and men were set to work to follow this all around. Up to this moment I had little hope of finding anything very definite in the way of walls.

- 99. It was now found that the whole of this basement wall, on all four sides, had been carefully embedded in burnt brick, laid in mud, for a distance of some ten to fifteen feet or more out from the walls. On laying bare the walls, down to the original ground level, the reason for this was very apparent. It was found from the lines of the great mouldings, running round the basement, that the walls had bulged out, and had also sunk in the centres some 7 or 8 inches, due, no doubt, to the immense dead weight of the superstructure and the very poor foundations provided. The danger of a collapse of the whole building must have been so imminent that this wholesale buttressing up was the only recourse left to prevent a disaster; and to this burying of the walls is due the good state of preservation in which we find what is left, and particularly of the images of the Buddha in the panels. I, at first, thought it a device to hide the images from the eyes of the early Muhammadan invaders, whose iconoclastic tendencies, in those early days of Islām were very pronounced; but even a casual look at the basement is sufficient to shew the real reason (Photos. Nos. 3429-3441).
- 100. The most perfect of the four walls is that on the north side, which I think, rises to within about two and half or three feet of its original height. Each of the four walls is a little over fifty feet long, and the north one rises, as it stands in its partly ruined state, to a height of $14\frac{1}{2}$ feet. It is built of brick with a very fine smooth surface. The moulded basement is 61 feet high, and consists of mouldings as shown in the photographs accompanying this report. Above this the walls are divided longitudinally into five spaces by two corner and four intermediate pilasters with bases and capitals. The cornice mouldings above the capitals are gone, and it is only one pilaster that still has a portion of its capital remaining. The corner pilasters are square below and octagonal (fluted) above. Each of the five bays has a large niche with ornamental drip stone above. In each of the three central niches is a seated Buddha in the contemplative attitude, with both hands in his lap, while in the outer panel, at the east end, is a complicated trellis pattern looking like a trellised window. The corresponding one at the west end is missing. The east and south walls are similar in design to this. The Buddhas are in terra-cotta, and have been painted—fair complexion, red robes (rather a foxy red), and the hair, eyebrows and pupils of eyes black. Over each image is a fine layer, about 1/32 of an inch thick, of what I at first thought was plaster, but which I found to be, rather, a very thin coating of superior clay which had apparently been smeared over the raw clay image and baked with it, so as to give a finer surface for painting upon. This peels off in places, but is quite red, like the body of the image, throughout its thickness. Buddha wears the robe over both shoulders and down to the feet. Most of these images have a circular Buddha wears the robe over mark on the forehead, between the eyebrows, represented by a small incised The seat of the image, in most cases, is the double lotus seat, circle (the $\bar{u}rn\bar{a}$). but the central image, on the south and east sides, is seated upon a four-legged settee.
- 101. The western face of the basement differs from the other three, and would appear to have been the principal or front side of the monument. Projecting from this face has been an addition, which it is difficult to understand, owing to its being in such a ruined condition. At a point 15 feet from either end of this face the wall comes forward at right angles 2 feet where there is a small corner pilaster. From these pilasters the wall runs parallel, on either size, to the face of the basement 20 feet. The middle portion between these two points is much ruined, but, upon excavating the débris, I found there were

three small shrines set in the body of the basement—one in the centre, facing west, and one each on either side of it at right angles to it. In the débris and fallen brick-work, here, were found over a hundred unbaked clay votive tablets, one baked clay mould for making them, and thirty-six corroded circular copper coins (Photos. Nos. 3442-3449).

- 102. These small shrines, no doubt, held portable images of the Buddha which were probably carried away. But in the centre shrine was found a fine image, 2'6" in height, of a prince or king, with a curled wig, and resting his left hand upon a wallet or money hag slung round his waist. It may be a portrait statue of the person who supplied the funds for the building of the stūpa (Photo. No. 3453).
- 103. Whilst the work of the excavation of the walls was going on, the well in the centre of the mound was sinking steadily, until the evening of the 19th February, when pakka burnt brick was struck in the middle of the floor of the well. Work was stopped until next morning. From the time of the unearthing of the Buddha images in the wall panels, an all-night watch of four men was put on the mound to guard against any attempt at mischievous mutilation.
- The Commissioner in Sind, the Deputy Commissioner of Thar and Parkar, of which district Mirpur-Khas is now the head-quarters, and two other officials, had arranged to come out and visit the mound on the morning of the 20th. They were thus fortunately present at the opening up of the brick chamber, and the finding of the relic coffer and relics. The cubical mass of burnt brick-work measured about 3'6" each way and about 2 feet deep. Upon lifting a couple of layers of brick from the top, a little square chamber or well was discovered within, about 15 inches square and 12 inches depth, in the centre of which, and fitting it fairly, was a large roughly-shaped circular stone. In each of the two corners beside it, the S.-E. and S.-W., was a little red earthen pot, with narrow mouth, full of sand. The other two corners were empty. The chamber was set with its sides north and south, and east and west. the top of this stone, which was the relic coffer, was a quantity of grey sand, such as is found a few feet below the surface here, in which were found coral and gold beads, very minute seed pearls and some grains of wheat. The upper stone was then carefully lifted, when it was found to be the lid of a heavier stone lying beneath it. In each stone, in the middle, had been scooped out a conical hole about 3 inches in diameter, that in the lower stone being about 3 inches deep and that in the upper, or lid, little more than one inch. The faces of the two stones were not very smooth, so did not produce complete contact with each other all over (Photos. Nos. 3451, 3450 and 3456).
- 105. In the middle of the hole in the lower stone, packed round with grey sand, was standing a little crystal phial, $2\frac{3}{8}$ inches high by about one inch wide at its widest part. It is six-sided and tapers slightly to the mouth, around which is a thick lip, and over which was placed a silver cap much corroded. On the top of the cap had been placed a copper ring, perhaps a finger ring, but very much encrusted with verdigris which had fastened it to the cap. In the sand, around the phial and around the stone coffer, were found more coral and gold beads, a very small gold ring, crystal beads and ten copper coins. These coins are much corroded, but it is hoped they may be cleaned sufficiently to reveal their identity.* They are about $\frac{3}{8}$ inch square and about $\frac{1}{8}$ inch thick. The coins already mentioned as having been found on the west face of the stūpa basement are circular.
- 106. An examination of the crystal phial, the lower half of which was encased in silver, much corroded, shewed that the bottom of it did not exist, it having been broken off. The silver casing was added to the bottomless bottle to form a new bottom. Within this phial was found a small cylindrical silver case, with lid at end like an ordinary tin case, about the size of 78 ths of an inch length of ordinary lead pencil, being rather more than a quarter of an inch in diameter. It had been wrapped round with gold leaf. As the lid was corroded on to the

^{*}These have been cleaned, and, though much defaced, look very like punch-marked coins. The circular coins are early Arab coins.

case it came to pieces in trying to remove it. Within this case was a smaller gold one, 76 ths of an inch long and 3 ths of an inch in diameter, with slide-on lid as in the case of the silver one, but in perfect preservation, the gold retaining its pristine lustre. This was opened, and its contents turned out on to a clean sheet of paper (not at the stūpa, but at the bungalow, before the gentlemen mentioned above). Its only contents was a small grain of some material about the size of a pin's head, and a few specks of dust. This was disappointing, and we began to fear we had drawn a blank,* until I tilted up the crystal phial, out of which came nearly an egg-spoonful of mouldy brown powder with some small lumps amongst it. The largest lump, about a quarter of an inch square and a tenth of an inch thick, has the curve and texture of bone that has been charred, and an examination of the rest, under a magnifying glass, leaves little room for doubt but that the powder is human funeral ash, and therefore the relic sought. There was far too much to go into the gold case and perhaps, for that reason it was placed in the bottom of the phial, under the silver case, the cases also being enclosed, since they had been made for it, and were hence sanctified to that use.

- 107. In the débris from the west face, were found two terra-cotta medallions, 8 inches in diameter, bearing images of Kubera, wearing a jewelled crown, from under which flow down upon his shoulders long wig-like curls. He is stout with a big paunch. In his right hand, resting upon his raised right knee, he holds a lotus, and in his left, upon the left knee, a depleted money bag.
- 108. The only stone about the stūpa was the relic coffer, everything else being in brick or terra-cotta.
- .109. In the Buddha panels, in the walls, he is in the contemplative attitude, while on the tablets we find him in the earth-touching and teaching attitudes. In the last he sits European fashion, with his legs hanging down in tront of the seat. Many of the tablets have nothing but attenuated dāgobās upon them of rather a Burmese pattern; and, on most, both with Buddha and the dāgobā alone, is found the Buddhist formula in letters of about the 7th or 8th century. These tablets vary in size from about 6 inches to about 2 inches, in the longest diameter.
- 110. After sending in the above report I have read the copy of a letter in the Bombay Gazette of the 9th March 1910, said to have been sent by the Jaina Swetambar Conference, Bombay, to the Commissioner in Sind, claiming that the "idols" discovered at the stūpa at Mīrpūr-Khās are Jaina images.
- I may say at once that I have ever found the Jainas to be woefully ignorant of the iconography of their own religion. To say that the images on the stūpa at Mīrpūr-Khās are Jaina is simply absurd, and the veriest tyro in the study of Buddhism and Jainism does not need a second glance at them to know what they are. I had a visit from a party of four Jaina gentlemen from Karāchi, who said they had heard that a Jaina mandapa had been unearthed here and that they had come to see it. They may have been sent in connection with the enquiries that the Conference said they were making, but they did not say so. However, I think I convinced them of their mistake in supposing the stupa to be a Jaina erection. They called one of the Buddhas on the walls Pārasnātha, notwithstanding the fact that Parasnatha always has a snake hood canopying his head, which this had not. Jain images are always nude to the waist, and, in the case of Digambar Jainas, nude altogether. These images have voluminous robes covering the entire person which are painted a dark red, the features being a wheat colour. The letter says, as distinguishing one from the other, "Buddha who in contradistinction to having both hands in the lap of the idol, is always represented as having only his left hand in the lap and his right hand a little raised above and taken as high as his bosom." Now, it so happens that in the votive tablets, that I have found, Buddha is in the earth-touching attitude, i.e., with one hand in the lap and one pointing down over his knee, and also in the teaching attitude with both hands raised in front of the bosom.

^{*}I am not so sure now but that this mite, which I have preserved, is a relic, and that there were the relics of two persons in the same reliquary. I am writing on this more fully in my article for the Archæological Survey Amnual.

In the last he has his legs hanging down from the seat, European fashion, and not cross-legged upon the seat as is the invariable attidude of the seated tirthamkara. Above all, beneath the images on the votive tablets, is the Buddhist formula.

- 112. A fuller account of the $st\bar{u}pa$ with plans and photographs will appear in the Archæological Survey of India Annual.
- 113. Before leaving Mirpūr-Khās I had arranged with the Public Works Department to have a wire fence placed around the stūpa, and I handed over charge of the monument to the Deputy Commissioner, who has since had it declared as a protected monument.
- 114. I have come to the conclusion that in Sind, in the early centuries of the Christian era, the prevailing religion was Buddhism, and that Buddhist establishments were thickly scattered over the whole province. Some of the remains of these which promise to outnumber Hindu or Brahmanical remains, are now coming to light, and one of the reasons why they have not been discovered earlier is that they have not been spotted by any one capable of recognizing them. For instance, the stūpa which stands close beside the railway, near Tando Muhammad Khān, which cannot fail to be seen by all who pass by, was supposed by an official, whom I met, to be a survey bench mark—a tower some fifty feet high!
- Tando Muhammad Khan.

 Tando Muhammad Khan.

 Tando Muhammad Khan.

 the north by west of Tando Muhammad Khān, emerges from a hillock of débris, being constructed of sun-dried brick. Its sides are scored by the rains of centuries. The outer ornamental casing of burnt brick has been removed, but in the débris may be found many sculptured fragments, shewing that the work must have been of the same style as at Mīrpūr-Khās. The stūpa must have been considerably smaller than the latter. The season was too far advanced to attempt any excavation work upon it, and it is reserved for next season.
 - 116. About 2 miles to the north-west of this, on the top of the hill, are the remains of another small $st\bar{u}pa$, which consist of a few heaps of débris. These $st\bar{u}pas$ were first brought to my notice by Mr. F. Wright, when he was Executive Engineer, Fuleli Canals.
 - Volume V, page 355, is a notice of a Buddhist stūpa upon a low flat-topped hill, about three and a half miles south by west of Jhirruck on the Indus, which was excavated by a Mr. Cole about 1853. At present there is nothing but a shapeless low heap of brick débris, in which there is hardly half a dozen carved bricks to be found, and no fragment of the walls remaining. In the centre, a hole had been dug to the ground level. There are signs of basements of other rough rubble buildings upon the hill top; there must have been a small community up there at one time. A number of carved bricks from Mr. Cole's digging was sent to the Bombay Branch of the Royal Asiatic Society, which may still be seen in their Museum. The plan given in the Journal is very inaccurate and must have been made from memory. Most of the bricks measure 18" × 10½" × 2½".

Ia.

- Pattadakal. eight miles in a straight line west of Bādāmī railway station in the Bijāpur district, but by the cart-track round the hills it is twelve miles. It is but six miles from Aihole, the ancient temples of which place have already been described in my previous report. It is but a small village, not so large as Aihole, but like it full of the remains of other days, when the early Chalukya kings ruled the land. Paṭṭadakal was probably their principal religious centre while Bādāmī was their civil capital. There are, within the village, two very old temples more or less the worse for centuries of weathering and neglect, while outside, to the west, is an old Jaina temple, and between it and the village the ruins of another.
- 119. Contrasted here, more strikingly than at Aihole, we have the northern and southern types of sikharas or towers, and these were erected long before the

hybrid mediæval Chalukyan style was evolved. The difference between these two types is very marked, the one rising in the heavy horizontal storeys of the south, and the other in the lighter and more graceful vertical lines of the north. Paṭṭadakal seems to have been a point upon the dividing line between the styles, where they both over-lapped.

- Ib. 120. Of all these old shrines, one only is in use as a religious building, and that is the largest, the temple of Virupaksha, facing the river. Fortunately this one has a number of inscriptions, from which we gather, not only the date of the erection of the building, but the circumstances under which it was built, together with the builder's name. It was built for queen Lokamahadevi in celebration of her husband Vikramāditya II having thrice conquered Kāñchī, in the eighth century A.D. There is very great resemblance between this temple and its sculptures and the great monolithic temple of Kailasa at the Elura caves, which is more than accidental, and it may easily be accounted for. Vikramāditya, when he sacked Kāńchi (Conjeveram), was no doubt so struck with the temples he found there, that he brought away architects and workmen to construct one on the same lines in his own capital. During the reign of his son Kîrttivarmā II, the Rāshṭrakūṭas under Dantidurga invaded the Chalukyan territory and practically wiped out that dynasty for the time being. At this time this king was excavating caves at Elura, where we find, among them, the great monolithic temple of Kailasa already mentioned. It is more than probable, then, that Dantidurga, or his successor, having seen the fine temple of Virūpāksha, or Lokeśvara as it was first called, had it copied in the rock at Elura, where it is the furthest north of any Dravidian temple that we know.
 - 121. As I intend contributing an illustrated article upon the old temples at Paṭṭadakal to the Survey Annual I need not go into further details about them here.
- Ia. Bādāmī, another centre of the older Chalukyan work, was the early capital of that dynasty when it was known under the name of Vātāpi. Here we have an important group of caves, partly Hindu and partly Jaina. The town with its lake behind it is held in the embrace of the hills which circle around them, throwing out fortified horns to the north and the south. The temples here, though some are as old as the oldest at Paṭṭṇḍakal, are smaller and plainer than those at that place.

 Ia. An interesting find that we made here was a temple of Lakulīśa, with a seated nude image of that deity in the shrine. The image had been broken in halves. The temple stands to the back or east of the Bhūtanātha group, on the east margin of the lake.
- of the tank, is a great fallen mass of rock, leaning against the cliff. It has so fallen as to form a natural cavern beneath it, entrance to which is by crawling under the rock, where a long tunnel-like opening is left. On the cliff face, inside this cavern, is carved a large image in a Buddha-like posture. But it is neither a Buddha nor a Jina. The image is bejewelled with necklaces, bracelets, and anklets, carved in the stone, and wears the sacred thread; the hair, so far as can be seen where not encrusted with chunam and oil, is in knobbly curls, and there is the Buddha-like lump on the top of the head. The legs are in the usual cross-legged position. The right hand, which is raised from the elbow before the breast, holds a mālā or rosary, the beads of which are being passed between the fingers. The left hand rests, Jina-like, in the lap, palm upwards.
 - 124. The image is seated upon a lion throne, the front of which is divided into three compartments. In the middle is a lion standing or sitting straight to the front, while the end panels have each a lion in profile looking outwards. On either side of the image is a *chauri* bearer, and behind him is the usual throne back as found behind images of Jinas. The whole image has been fouled with constant oiling, and the top of the head and forehead are a dirty shiny white, as if plastered with *chunam* or white paste and oiled.
 - 125. The story in connection with it is that, once upon a time, there was a $r\bar{a}j\bar{a}$ or $r\bar{a}y\bar{a}$, who was afflicted with white leprosy, who, on coming to Bādāmī, B 640—11

was cured of it. This is his image, it being known locally as Koshaṭrāya, i.e., the rāyā who had "kushṭa" or white leprosy. It is evident that the story has been suggested by the white shiny patch on the head.

- 126. Beside it, on the rock, a little way to the right of the figure, is a very small image of a fat little figure.
- 127. It has more the appearance of a Bodhisattva than anything else. Behind the head is a nimbus, while, above it, are the branches and foliage of a tree. Or can it, by any possibility, represent the Rāshtrakūta king Amoghavarsha I (Cir. A. D. 850) "after he had abdicated the throne in consequence of the growth of the ascetic spirit in him?"* He was a most devout Jaina and took a very active part in religious matters. It is possible he may have retired to Bādāmī, and have spent the remaining years of his life in or near the Jaina cave, which, at that time, was, perhaps, two hundred years old.

 Adil Shahi Coins.

 Of the 'Adil Shahi dynasty of Bijapur, amongst which there are at least eight types of the kings being particularly beautifully designed coins. The Rev. Dr. George Taylor of Ahmedabad has helped me in a preliminary examination of these, but there are many doubtful points in their reading which have yet to be settled. These are specially interesting since 'Adil Shahi coins have not, as yet, been published, nor included in the lists of any museum that I am aware of.

PROGRESS REPORT OF THE ASSISTANT SUPERINTENDENT.

BOMBAY.

- 1. In my last year's Report I have stated that I was at Mandor for two months, helping the Director-General of Archæology, who was excavating some old ruins there. In fact, I was there till about the middle of April 1910.

 From Mandor I proceeded to Junagadh in Kāthiāwār to prepare estampages in duplicate of the Asoka edicts, under the instructions of the Bombay Government, General Department, communicated in their letter No. 5086 of 12th August 1908. The estampages were taken and duly despatched to the Director-General in order to be forwarded to Prof. E. Hultzsch, who has undertaken the work of revising the Corpus Inscriptionum Indicarum, Vol. I.
- 2. A word or two will not be out of place about the shed that has been raised over the inscription rock (Photo. No. 3285). This rock contains no less than three inscriptions, of three different periods, and engraved by three different royal families but which are all of equal importance. And the antiquarian world can never be too thankful to the Darbar for having erected a substantial structure over it to preserve it from further injuries. But the structure is a little too ornamental and too much in modern style to be in keeping with the object of hoary antiquity which it preserves. A plain structure similar to that raised over a rock inscription of the Chohan family at Bijoliā in the Udaipur State by the local chief would have suited the purpose here much better, not to speak of the expenditure which also it would have saved. Again, enough space is not left between the inscription rock and the walls of the shed to enable one to photograph it if he wishes.

I.

- A rival to this inscription rock has recently sprung into existence. About half a mile to the east of this place on the road which leads to the Girnar hills is another rock containing all the fourteen edicts of Aśoka. These were caused to be incised, I am told, by the Junagadh Darbar under the supervision of Mr. Vallabhji Haridat Āchārya, Curator of the Rājkot Museum. I wondered what could have been the object of preparing this lithic copy, so to say, of Aśoka's inscription. But I was informed that in case the original genuine inscriptions were destroyed, its present copy might acquaint the world with its contents. If this explanation is true, it is inexplicable why the inscriptions of Rudradāman and Skandagupta were not similarly copied. For, these are also important, and their copies would be useful in informing the world of what these inscriptions contained, in case the latter were by some mishap destroyed. Again, it is inconceivable how the lost portions of the fifth and thirteenth edicts could have been restored beyond all doubt. Anybody who has studied the Aśoka inscriptions knows how impossible it is to propose any restorations in the Girnār text, that can be pronounced certain and indubitable, although we have versions of the same edicts elsewhere to help us. Be that as it may, the new inscription rock will not come for some centuries at least to have historical interest of any kind attached to it, and will for the present remian a mere object of idle curiosity. In the meanwhile, it would be a good thing if the Darbar issues orders to engrave somewhere on the new rock in modern Devanagarī the reason why the new inscription was incised and the date when it was finished. This will for ever prevent people mistaking it for the genuine Asoka rock inscription.
- 4. An object of great interest to the antiquarian is the Bahādur Museum at Junāgadh. Here are deposited the relics and sculptures (Photos. Nos. 3283-3284) found by the late Sir James Campbell while excavating the Boriyā stūpa. The latter has been very well described by him in Journal Bombay Asiatic Society and by Mr. Cousens in Journal Bengal Asiatic Society. So I forebear to describe it here. I was able here to examine carefully the Kshatrapa coins unearthed in Uparkot some time ago and described by the Rev. Mr. Scott in

the Journal Bombay Asiatic Society, Vol. XX, p. 201. Hon. Mr. Mirza Abbas Ali Baig, who was then Diwān of Junāgaḍh, was kind enough to allow me to make a selection therefrom for our Museum, which is ultimately to be merged into the Prince of Wales Museum. Fifty-seven coins were accordingly selected, perhaps the best of the whole lot. Many other sculptures, brought to light in the various parts of the State, have been collected and exhibited in the Museum. (Photos. Nos. 3281-3282). They are not of much interest except one. This one is a rather worn out and mutilated image of Sūrya. But what is of interest here is that a sword is represented as going right across his body from behind.

5. Junagadh, and Mount Girnar, which is not far off, are full of antiquities varying from Buddhist caves of the 2nd or 3rd century to the Jaina temples of the 13th century. It was, indeed, a sad sight to see some of these caves utterly neglected and, in fact, used as public latrines. I had spoken about this matter to the Diwan, but I do not know what steps have been taken to put a stop to this nuisance. This brought us to the end of our touring season 1908-1909.

JAIPUR STATE,

6. Our next touring season commenced early in November following and with a view to visit Bairāt. Here is an Asoka inscription, whose estampages also

we were instructed to prepare. The route, by which we were advised to go, was viâ Nīm-kā-Thānā, but this was any but satisfactory; and when I actually went to Bairāt, I was informed that the best route was from Alwar viâ Ghāzi
MAVNDA.

kā-Thānā. While at Nīm-kā-Thānā, I visited the chhatris of Māvṇḍā, three miles north of it (Photo. No. 3474). The two largest of these are of Dalīlsingh and his son Lachhmansingh, both Rājāvats of Dhūlā, a well-known seat of jahāgir in the south of the Jaipur State. Both are said to have died there while fighting with Javhārmal, the Jāṭ king of Bharatpur, who was a source of great trouble to the Jaipur rāj. In one of these chhatris is a short inscription mentioning the name of Dalīlsingh and specifying the date 1827 V. S. = 1770 A. D. There is another inscription here but in a third small chhatri. It speaks of the chhatri as being of Rājā

Harasahāyajī and as being built in Samvat 1825.

III.

- 7. Bairāt has been commonly identified with Virāṭapura or the city of Virāta, king of the Matsya country, in whose royal household the five Pandu brothers took service in their disguised characters. This claim has no doubt been disputed by two other places in the south. One of these is Hāngal in the Dhārwār district, which, in the inscriptions of the Kādamba dynasty, is called Virātanagara. disguised characters. places in the south. The other place is Dholkā, in the Ahmedābād district, near Kāthiāwār. And it is this Dholkā, with which Virāt rebuilt as Vijayapura by the Guhilot prince Vijaya, is to be identified, and not with Bairāt as supposed by Cunningham. There can, however, be no doubt that the Virātapura of the Mahābhārata is to be identified with our Bairāt. For, in the first place, the name Virāta is preserved in Bairāt only, and not in Hāngal or Pholkā. Secondly, the province round about Bairat is still known as Matsyadeśa. And, thirdly, most of the places sacred to the memory of the Pandavas, which are mentioned in the Virātaparvan of the Mahābhārata, are still pointed out at Bairat by the people. Thus we have Bhim-ki-dungri where Bhima lived, also the hill where Kichaka's palace was situated, the Bana-ganga which was brought into existence by Arjuna with his arrow, the marks of the feet of the Kurus and the cattle pilfered by them, and so on. All things considered, Bairat has the best claims to be identified with the old Viratapura. This is quite in keeping with the fact that at Bairat only objects of the greatest antiquity are found.
- 8. Bairāt has also been identified with the Po-li-ye-to-lo of Yuan Chwang, whose king according to that Chinese traveller, was of the Fei-she or Bais Rājpūt tribe. Al-Bīruni (A. D. 930-1031), contemporary of Mahmud Ghazni, speaks of Narānā or Bazanah as the capital of Guzrāt. His details suffice to identify it with Nārāyanpurā, the capital of Bairāt. The district round

about Bairāt thus appears to have been once called Gujarāt. This need not surprise us because this district was once held by the Gurjara-Pratīharas and afterwards by the Badgūjars who are still found in numbers there.

- The principal objects of antiquarian interest here are three: (1) the temple of Parsvanatha, (2) the Bijak-pahad, and (3) Bhim-ki-dungri. The temple is now in the possession of the Sravgis, who in north Rajputana denote Digambara Jainas. There can, however, be no doubt that it originally belonged to the Svetāmbaras. There is an inscription-stone stuck up in the enclosure wall near the temple (Inser. No. 2506). It is dated in $\hat{S}aka$ 1509 = A. D. 1587 when Hīravijaya was the pontiff and Akbar the supreme ruler. Then at Vairāta had been stationed by the latter one Indraraja who was in charge of the dramga or forests of Vairāta. He was a Śrīmāla bania by caste and of Rākmaņa gotra. He had already been placed, we are told, in charge of many villages by Todaramalla, Akbar's minister. He erected this temple, which was named both Mahodayaprāsāda and Indra-vihāra (doubtless called after him), and dedicated it to Vimalanātha is here called mūlanāyaka, of course, with Vimalanātha. reference to the other Tirthamkaras, viz., Pārśvanātha, Chandraprabha and Ajayarāja, whose images also he set up in his father Bharamalla's, his own, and his brother Ajayarāja's names respectively. In the inscription Vaīrāta is called tāmr-ādy-aneka-gairika-khūnī-nidhānībhūta, i. e., the receptacle of many hill mines such as those of copper. This agrees with the mention of Abul Fazl in the Ain-i-Akbari that Bairat in his time possessed very profitable copper mines. Both the town and its surroundings are still covered with fragments of slag from the ancient copper works.
- Bijak-pahād has been so well described by Cunningham that there remains very little for me to say. I believe with him that what is called the Bhabra edict of Asoka was discovered here by Major Burt. As the word bijak shews, the hill was so called because there was some inscription on it. And the old people of Bairat still say that the inscription stone was carried off nearly eighty years ago by a European officer. His name, however, is curiously given as "Imti" and not Burt. I do not believe that this inscription was found at Bhabru, which, by the bye, is the correct name of the place, and not Bhabra. Bhabru is only twelve miles from Bairat, and it is impossible that there were two different places so close beside each other, which were centres of Buddhism and where Asoka, therefore, thought it advisable to have his inscriptions engraved sepa-On the other hand, I visited Bhābrū and made a careful search there. But not a single object of antiquarian interest was found. Bhabru, before the railway line had been opened, was a place of importance, as it was a halting place on the road from Jaipur to Delhi. This is attested by the number of dharmaśālās and sarās that exist there, though now in a dilapidated condition. Major Burt on his way either to Delhi or to Jaipur must have halted at Bhābrū, and, having heard of the Bijak-pahād and the inscription thereon, must have visited the place, especially as it was not more than twelve miles. Bairāt being then a comparatively insignificant place, the inscription stone must have been named after Bhābrū. The inscription stone originally lay, I am told, near the shrine of Hanuman below the rock known as top or canon, on the first or lower platform on the summit of the hill. All people told me, as was quite natural with them, that the inscription contained some clue to the whereabouts of some concealed treasure. One man even gave me the following transcript of it: Sīśolā Sābolā Maimdolā Akhebad bīstār lākh gandā bhār hai lījyo kāl dukāl, i. e., "in the space enclosed by the Sīśolā well, Sābolā and Maimdolā tanks, and the Akhe banian tree is (a treasure), weighing one lac of elephants; it should be taken out when there is famine." It was in search of this treasure that excavations were carried on by a killedar named Kītājī Khamgārot in A.D. 1845, and not by the Mahārāj of Jaipur as Cunningham says. The latter adds that nothing was discovered in this excavation. Carlleyle was, however, told that a golden casket had been discovered. But from the enquiries I made, I learnt that, as a matter of fact, nothing came to light (Photos. Nos. 3479-3481).
- 11. What is called the Bairāt Minor Rock Edict was first discovered by Carlleyle. This edict is engraved on a block lying separately, but immediately below the hill locally known as Bhīm-kī-dungrī, or the Pāṇḍus' Hill as he calls it (Photo. No. 3476). It is inscribed on the eastern face and near the lower

end of the rock (Photo. No. 3477). The inscription is highly weather-worn, and I doubt whether even the estampages I took would be of any use in finding out the correct Bairāt version of the edict.

- 12. The following paragraph from Carlleyle's description of Bairat beautifully illustrates how an antiquarian is in danger of jumping up to wild conclusions, if he does not properly and fully avail himself of local information:—"I have to mention," says he, "a curious discovery I made in the ground immediately in front of the rock on which the inscriptions are, and close under the larger inscription. There were two larger boulder stones half buried in the ground directly under the larger inscription; and as the lowest line of this inscription was at the height of only 1 foot from the ground, I found the boulder stones very much in my way in standing to take an impression of the inscription. I consequently ordered my men to dig the earth away from the boulder stones, and then to roll them out of the way After these larger boulder stones had been removed out of the way, I found a layer of smaller boulder stones underneath them, amounting to perhaps half a dozen or more altogether. After removing these smaller stones I came to earth; and finding a small fragment of old pottery, I dug still deeper into the earth, and at a depth of about 2 feet below the original position of the bottom of the larger boulder stones, or about 2 feet 9 inches to 3 feet below the surface of the ground, I discovered four earthen vessels, which, on examination, I found to be cinerary urns containing human bones. These vessels were placed regularly in a line, all on the same level Could it be possible that these cinerary urns and human bones might be in some way connected with the purpose of the inscriptions immediately above them? What seemed to me the most extraordinary circumstance was, that the boulders and stones which lay over the top of the cinerary urns appeared to be in situ, or in their natural position, like any of the numerous other boulders which were sticking in the ground round about; and I do not think that these stones were placed in the position in which I found them by any artificial means! I therefore believe that the boulder stones must have come into the position in which I found them, jammed against the rock, by the agency of some powerful flood or current of water; and consequently that the cinerary urns and bones may be of very great and unknown antiquity.'
- 13. Now, the truth of the matter is that it is a custom with the people of many castes in Bairāt to collect the ashes and bones of the dead body on the third day after cremation and deposit them in an earthen urn. They bury it underground with some mark to distinguish it from others, and leave it there till they find it convenient to take out the ashes and throw them in the Ganges. The whole place on the east and north of the Bhīmjī-ki-dungrī, below which is the Aśoka inscription rock, is cemetery ground, and such cinerary urns are buried, I was told, all along this line of the hill. In fact, I was shewn a spot, quite in the immediate vicinity of the inscription boulder, where the ashes of a person, dead about a week before I came there, were buried. It is no wonder that such remarks as those of Carlleyle afford a nice occasion to people like the author of the Pickwick papers to crack jokes at the expense of antiquarians.
- 14. Not far from this hill and to the east of it are what are called Sati-kī-chhatrīs or maṇḍhīs. They are structures raised over the places where women of Bairāṭ in ancient days became satīs. The chhatrī described by Carlleyle is one erected over the ashes of Lāḍī-Jamanā, who immolated herself as satī. Her husband's name was Pāṇḍe Chhītaramala, son of Toḍara and grandson of Dhaṇīyā, and he died in V. E. 1743. Lāḍī-Jamanā was the daughter of Mohana, a minister, and of the Jhāḍolā śāsana. The chhatrī was built by Chhītaramal's nephew Sāvaldās, who is said to have been a Gauḍ Brāhmaṇa and of the Hariītavāl śāsana. One of Chhītaramal's brothers was Sabalsingh, who obtained the title singh and the village of Pāpḍī as jahāgir from the Muhammadan Emperor, Naurangśāh. Who this Naurangśāh was is not definitely known, but he is commonly indentified with Aurangzeb. The present jahāgirdār of Pāpḍī is a descendant of Sabalsingh, and is called thākar although a Gauḍ Brāhmaṇa. In the chhatrī is the sculpture of a horseman, who is always taken to represent the cavalry soldier that died on the battle field and was the husband of the women who followed him as satīs.

Such sculptures are found in numbers throughout the whole of Rājputānā and particularly so in Mārwār. But I fail to understand how Carlleyle finds in this mode of sculptures an intimate connection with the Kalkī avatāra. Kalkī, who is to come yet, is to be a warrior riding on a horse, and is consequently naturally figured like a horseman. But how "it has been appropriated as a symbol of satti," as he says, is certainly inexplicable to me.

situated in a gorge of hills called Kālī Koh, and was the ancient capital of the Kachhwāhā Rājpūts for six centuries, being an ideally strong place. By reason of its rather low and cramped situation, it became too small for being the capital of such an influential and rapidly extending state as Jaipur had become, and so Sawāī Jaysingh had to build Jaipur six miles off. The most important and probably the oldest temple here is that known by the name of Ambikeśvara, said to have been built by Rāja Ambarīsha, son of Māndhātā, king of Ayodhyā. And it is even said that the place Āmer or Amber was so named after this prince. The temple in question is a group of six shrines. The principal shrine is dedicated to Ambikeśvara, but contains nothing old. The linga called Ambikeśvara referred to by Tod and Cunningham is really not in a kunda or tank but here in this shrine. In front of it is a dipa-stambha or lamp column, which, it is said the king of Āmer always saw before taking his day meal so long as it was the capital. Near this shrine is another, which faces the north and has two porch pillars of at least the tenth century (Photo. No. 3488). In the sanctum are four images. Two of these are of Trivikrama, one being as old as the pillars themselves. These images are lying loose, but are worshipped every day. In a shed close beside this shrine is an old sculpture with three figures, probably a fragment of some old door-frame, which also is, strange to say, worshipped as the image of Sītalāmātā (Photo. No. 3489).

I.

I.

III.

- 16. At Amer I found no less than three temples which were originally Jaina but were afterwards appropriated to Siva worship. The oldest of these is Lāl-Śāh-kā-mandar. The interior of the temple, as it is at present, consists of three contiguous shrines with a gūdhamandapa or closed hall in front. The lintels of the shrine doors are carved with the figures of Jinas, and so also the doors of the gūdhamandapa itself (Photos. Nos. 3482-3484). But on a raised daīs in the middle of this hall are placed several Brahminical images. In the centre is a linga, which is daily worshipped. There are three more lingas, four Nandins and three Gaṇapatis. One of the lingas has four busts carved in front, one on each side. In one of the niches in the inside of the walled enclosure is an old elegant image of Kārtikeya (Photo. No. 3485) not later than the tenth century. He is seated on a peacock, and had originally six hands.
- 17. There are many other temples too numerous to mention, none of which except two are either archæologically interesting or visited by travellers. These two are the temples of Sūrya and Jagatsravanjī. The first is a quite modern edifice, and has only latterly acquired some importance in the eyes of the antiquarian, as it was here that the late Professor Bendall found an inscription (Inscr. No. 2507) dated Samvat 1011 Bhādrapade vadi 11 Sukra-dine. Bendall is, however, wrong in saying that it is on a tablet of this temple that the inscription was engraved. It was really on a pillar in the front row facing the east, and had well nigh been concealed when I was there by a thick coating of whitewash. The Jagatsravanjī temple is a very fine building in excellent condition, famous for a remarkable gateway and with a beautifully carved Garuḍa pavilion in front (Photos. Nos. 3486-3487). It was built by Mānsingh, it is said, by expending one crore and eighty lacs of rupees. The image in the shrine is of Girdharjī—the same that was worshipped by Mirābāī. Mānsingh brought the image from Chitor when he conquered it. In the battle fell his son Jagatsingh, after whom the temple was named Jagat-siromani, which has now been corrupted into Jagat-sravanjī. The image is of black stone with two hands. In the Garuḍa pavilion are two short inscriptions with the dates V. E. 1611 and 1719.

- 111. 18. But the most interesting object to a tourist is the palace. It is built rather low in the hill instead of on lofty pedestal of rock, but it is most picturesquely situated as it overlooks the Māvṭā lake. The palace was commenced about 1600 by Rājā Mānsingh. Additions were made by Jaysingh I (the Mirzā Rājā), and it was completed in the 18th century by Sawāī Jaysingh. It was this latter prince, who built the peerless gateway, called the Gaṇeś Pol (Photo. No. 3491), which gives access to the Diwāṇ-i-khās (Photo. No. 3492). The topmost room on this gateway is called Suhāg-mandar, from which the royal zanana looked at the assemblage in the Diwāṇ-i-Ām below. From a balcony here the nicest view is obtained of the Jaygaḍh fort, which crowns the summit of a hill 500 feet above.
 - 19. On the east of the Diwāṇ-i-Ām is an open plain, where five young buffaloes are sacrified on Navarātra days. The north-west corner leads to a small shrine dedicated to Silādevī, who appears to be no other than Mahishāsuramardinī. In front of the shrine a goat is daily sacrificed early in the morning, lights are waved before the goddess at about 10, and bhog or offerings presented exactly at noon. The priests are Bengālī Brāhmaṇas, who have long since forgotton their mother tongue, the dress and every thing of Bengāl except the custom of eating flesh which in the present case is the bhog—the goat's flesh—offered to the goddess. In fact, it is said that this goddess and her priests had been brought by Rājā Mānsingh from Bengāl.
 - 20. Amer having soon become unfit for accommodating the fast increasing population of the capital of the State, Sawāi Jaysingh JAIPUR. in 1728 transferred it to Jaipur built by himself. Objects of antiquity can, therefore, be hardly expected to be found here. While engaged in seeing the local Museum, I was agreeably surprised to find some sculptures stored in the corners of some quadrangles. Some of them were beautiful, artistic, and of an early age. They had been all huddled together at different places without being sorted. The Resident also, who is keen on antiquarian matters, has collected several images and placed them in his garden. It would indeed be a very nice thing if both collections are brought together, properly arranged, and carefully deposited in some room in the Museum building. This room would thus serve all the purposes of the Archæological Section, which seems to have been totally ignored here. Another work I was engaged upon at Jaipur was the preparing of a list of antiquarian remains in the Jaipur State. It is indeed a pity that there is no well-informed and enthusiastic antiquarian in this state just as we had Pandit Gaurishankar Ojha at Udaipur and actually have Munshi Deviprasad at Jodhpur, although Jaipur is in no way inferior to Udaipur or Jodhpur. Hence the list for this state that had already been supplied to our office is not as complete and accurate as those for the Udaipur and Jodhpur States. I, therefore, consulted almost all those persons who could pretend to any knowledge of antiquities in this state, and was thus able to draw up on the whole an accurate and reliable The tour which I undertook thereafter in the Sekhāvātī list for our purposes. province will bear witness to it.
 - 21. Eight miles to the south of Jaipur is Sanganer, said to have been founded by Sāngā. There is a temple here called Sāngābābā-SANGANER. kā-mandar, wherein his picture is worshipped. There is also a temple of Sangesvara-Mahadeva, who was doubtless established here by Sanga. But who this Sanga was is not known beyond all doubt. is said to have been one of the seventeen sons of the Kachhwaha king Prithvīrāja. He killed one Rājpūt named Karamsingh, who was residing at Mojamābād. The latter's Chāran avenged his death by murdering Sāngā in the orchard of Kuvar Kishansinghjī. There is a large old palace here, a part of which is now used for the local dispensary. It was formerly occupied by the heir-apparent of the Jaipur State, and it is said by some that this too was built by Sanga-baba. The only object of antiquarian interest here is the Jaina temple called Singhiji-kā-mandar. Who this Singhi was is not known. This temple is supposed to be of the 11th century, and is compared by many tourists with the Abū temples for their deep beautiful carving. But to me at any rate it does not appear to be older than the 15th century (Photos. Nos. 3493-3494).

This is now a Śrāvgī temple and also appears to have been originally so, as the images of the Tīrthamkaras are all nude. In the row of the subsidiary cells, most of the images have inscriptions engraved on them. But it is by no means certain whether the images have been there from the beginning or were brought from elsewhere. For most of them seem from their inscriptions to have been originally at different places, such as Bhrādakhedā, Vāmsakhoha and Mojābāda. None of these except two is earlier than V. E. 1658, inscriptions of which date are referred to the reign of Mahārāja Śrī-Mānasimghajī of the Kūrma dynasty. Another variant of the latter name is Kuchhāhā. This dynastic name is mentioned in connection with Sawāī-Jayasimha, who is therein called Ambāvatī-svāmī, i. e., lord of Ambāvatī or Amer. The date supplied for him in this inscription is samvatsare vahni-vasu-mun-īndu-mite 1703 Vaišākha-māse kṛishṇa-pakshe ashṭamī-tithau Budhavāre.

- 22. Chāṭsū is eighteen miles south of Sāngāner, and is the principal town of a tahshil of the same name. The antiquities of Chatsu have already been described by Carlleyle in Archæological Survey Reports, Vol. VI, page 116 ff, so that there remains very little to be said. Old sculptures are found in abundance here either lying loose or built into walls. But not a single temple that is old is now to be found in or about Chatsu. Carlleyle, however, says: "There is only one really old temple now standing in all Chatsu, and that is a small temple, with an ornamented conical spire, on the south-west side of the town; but there are no pillars in this temple and no inscription." I searched hard after this temple, but in vain. I also made many inquiries whether any ever existed. however, what may be called a miniature shrine, standing "on the south-west of the town" as Carlleyle says, but this has no conical spire, at any rate not that kind of spire with which an ancient fane is surmounted (Photo. No. 3946). The spire here corresponds to the roof, that ordinarily crowns a sabhāmandapa. This miniature shrine is close beside the modern temple of Bāmanji, almost on the edge of the Golerav talav and is scarcely even three feet high. I wonder what purpose it could have served.
- 23. There is only one antiquarian object now lying in Chāṭsū, which is of sufficient interest for us. It is "a Kutila inscription of twenty-six lines on a broken black stone," as Carlleyle calls it (Inscr. No. 2508). In his time it was "built into the side wall of the steps leading down into a great tank at Chatsu,"—doubtless the Golerāv talāv as it is known there. When I visited Chāṭsū, it had been stuck up into a wall of the dilapidated temple of Raghunāthjī in the immediate neighbourhood of this flight of steps. The temple had almost completely fallen down, I was told, on account of the high waters during the last monsoon caused by recent extensions to the talāv on the south-west side. A new temple to that god was being built from the materials of the old, when I was there. With this end in view the old temple was being razed to the ground, but without the least care being taken for the safety of the inscription stone, which had already been broken into three fragments. Soon after leaving Chāṭsū I wrote to the Resident to move the Jaipur Darbār to take some speedy steps for the safe custody of the stone, and the Jaipur Darbār kindly promised to remove the stone carefully to the new temple that is being built. I hope the Tahsildār receives orders from the Darbār before the stone is broken into atoms.
- 24. The inscription consists really of twenty-seven, and not twenty-six lines, as Carlleyle says. It gives an account of an entirely new Guhila dynasty, not known to us from any other records. I am going to edit the inscription in the Epigraphia Indica, and consequently forbear to give a summary of it here. Carlleyle says that "in this inscription mention is made of a raja, Sri Siva Jaje Guhila, who appears to have lived between the eleventh and twelfth centuries." Now, a king named Sivarāja is no doubt mentioned in line 24, but he is therein called a Chāhamāna, and not a Guhila. This Sivarāja had a daughter named Raṭṭavā, who, we are told, was married by the Guhila prince Bālāditya or Bālārka. And in commemoration of this queen who died, Bālāditya, we are imformed, erected a temple of Murāri (Vishņu), which is the main object of the inscription to record. The inscription, curiously enough,

ends with the word Samvat without, however, the actual specification of the date. But though no date is given, there can be little doubt that it is to be assigned to the 10th century. Sivarāja, therefore, could not possibly have lived between the 11th and 12th centuries, as Carlleyle asserts.

25. It will thus be seen that the inscription belongs to a Guhila dynasty-This is quite in keeping with the tradition that Chāṭsū was in the possession of the Guhilas before the Kachhwāhās took it. Golerāv, the name of the talāv, also appears to be a corruption of Guhilarāja, another indication of the place having once been held by the Guhilots.

III.

- Two miles north of Chātsū is a hill called Sivdungar, which is crowned with, as Carlleyle aptly says, a fortified temple. It was originally a Śrāvagi fane, but now appropriated to Śiva worship. The whole temple is a modern construction, but old pieces of sculpture are here and there imbedded into the walls. The shrine is empty and in the closed hall (gūdhamandapa) is a linga, which is worshipped (Photo. No. 3498). The shrine door is doubtless old, perhaps as old as the 8th century. Carlleyle says that "there was one sculpture in particular, built into the left jamb of the door of the present temple, on which there is a representation of two antique-looking human figures standing under a double-topped umbrella, and which I would be inclined to attribute even to a Buddhist origin, although the sculpture may be simply of early Jain execution." Such sculptures, however, are quite common in Rajputana in very early temples, and there is nothing peculiarly Buddhistic or Jaina about them. the northern extremity of the temple enclosure is a Jaina chhatri, which contains a beautiful white marble pillar (Photo. No. 3499). The figures carved on them Carlleyle takes to be those of the Tirthamkaras. But this is a mistake, for, as the inscription incised below each shews, they all are representations of the various pontiffs of the Digambara sect. The inscriptions also, that have been found here, confirm this conclusion. Thus one of these begins with the date Sam 1556 varshe Vaiśākha śudi 6, and then mentions the names of the pontiffs, who were of the Mulasamgha, Sarasvatī gachchha, Balatkāra gana and in the line of the āchārya Kundakunda. The name of the first pontiff here given is Padmanandin. He was followed by Subhachandra and Jinachandra. One of Jinachandra's pupils was Ratnakīrti, at whose instructions some Khandelvāl banias of Ajamera gotra are said to have offered obeisance in the temple. The name of the place, where this temple was, is Champavati, doubtless one of the names by which Chāṭsū is known. The Suritāna, i.e., the Sultān, at that time was Gyāsadīta, in all possibility Ghiyās Shāh Khaljī of Mālwā, and the local chief was rājā. Bhāmmara, who belonged to the Kūrma, i. e., unquestionably, the Kachhawāhā, family. No king of this name, however, is to be found in the dynastic list of Jaipur. The pontiffs, mentioned in this inscription, are found in the pattāvali of the Digambara sect published by Dr. Hoernle in Indian Antiquary, Vol. XX, pp. 354-355, but therein between Subhachandra and Jinachandra is placed another pontiff of the name Prabhachandra.
 - 27. After leaving Chāṭsū, I commenced my exploration work in the Sekhāvāṭī province of Jaipur. The north of the Jaipur State is split up into two great divisions, one called Tamvrāvāṭī and theother Sekhāvāṭī. Tamvrāvāṭī is so named after the Rājpūt tribe Tamvara, the same as the Tomara of the inscriptions. According to the traditions, the Tamvars were at first reigning at Delhi, but were ousted from there by the Chohāns. Consequently they migrated southward, and settled at Pāṭan in Tamvrāvāṭī. The other province was called Sekhāvāṭī after the Sekhāwats, one of the Kachhawāhā clans originated from one Śekhājī. By far the larger portion of this province is in the hands of the tributary chiefs of the Jaipur Mahārājā, who are all Śekhāwats. Of these Sīkar and Khetrī are the two principalities of note and inportance here.
 - 28. The first place in Śekhāvāṭī which I visited was Khāṭū in Sāmbhar Nizāmat. It was no doubt once a place of antiquity and sanctity. It is mentioned in a Rāṇpur inscription as one of the important places conquered by Rāṇā Kumbha. But an earlier reference to it is to be found in the celebrated Harsha inscription of A. D. 973, in which it is mentioned by the name of Khaṭṭakūpa. It was then

also the name of a district. It had also been celebrated for the temple of Syāmjī, which was demolished by the Muhammadans who built a mosque out of its materials. Pieces of old sculpture may still be seen in the walls of the mosque (Photos. Nos. 3500-3501).

29. From Khāṭū I proceeded to Revāsā principally with a view to visit Jinmātā. Revāsā is nearly sixteen miles north-west of Khāṭū, and is in the jahāgir of the Khaṇḍelā chief. Though I did not expect to find any antiquarian object here, I found one temple no doubt modern but containing two or three old pillars of the twelfth century (Photo. No. 3503). This was the temple of Kalyāṇjī. But a still more interesting object was a chhatrī near the Uparlā kuvā, said to have been built by a Vanjārī. The pillars used here are deeply carved, and cannot be later than the tenth century. Some of them have been put up upside down (Photo. No. 3502). I wonder whence these pillars were brought. At the ancient sites round about Revāsā that I inspected, none of this size were found anywhere.

I.

I.

- 30. About six miles to the south of Revasa is the temple of Jin-mata. It is situated at the foot of a hill, and is surrounded by a thick jungle. Round about the temple are numbers of tibārīs and dharmaśālās, and beyond these are a few hamlets belonging to the pujāris, of whom no less than 250 families are settled here. They are all Parasara Brahmanas, and belong to one nakh, viz., Bhopa. They say that their ancestor Mallajī first came here with king Harischandra of Dhara as his priest. The waters of the streamlet close by the temple cured him of his leprosy, and the king built a temple to Mātā, and kept him there as her pujārī. Four-fifths of the presents offered by pilgrims belong to them, and one to a Chohan Rajput of the Sambharia khamp, who stays at Reta, three miles from the temple. Some one of his family always stays there to claim his dues. The pujārīs have recently so much multiplied that in spite of the pilgrims flocking there they obtain a scanty living. Some have, therefore, taken to tillage. Fairs are held here twice a year, once in Chaitra (March-April) and once in Asvina (October-November), and continue from the 4th to the 8th of the bright half, that held in Chaitra being the grandest. The word Jin is said to be a corruption of Jayanti, and her full and real name is Jayanti-mātā. The goddess has eight hands. As she is almost completely swathed in clothes, it is impossible to say what she is like. But from the description given to me she seems to be Mahishāsuramardinī. The Chohān pujārī sacrifices a goat every month on the 8th of the bright fortnight, but outside the sabhāmandapa. The Mātā is notorious for her drinking propensities. It is said that if she is to be offered liquor, at least three cups have to be offered. These cups are generally taken to the goddess by the Rājpūts. The lips have only to be touched with the cup without tilting it in any way, and lo! the whole quantity is quaffed in an instant. It is said that Bhairavsinghjī, father of the present chief of Sikar, took ten camel loads of liquor in order to test the strength of her drinking propensity. But when the camels were unloaded, it was found that the bottles had been emptied of their contents. Inside the shrine are two lamps, one of ghi and one of oil, kept burning unceasingly, the expense thereof being paid by the Jaipur Darbar. The Khandela chiefs contribute only Re. 1-4-0.
- 31. Now, with regard to the architecture of the temple the sabhāmandapa is doubtless old, and is, on the whole, fairly well preserved. The pillars closely resemble those of the later Osiā temples, and cannot be later than the 10th century (Photos. Nos. 3505-3506). But the wall, which runs round the sabhāmandapa on the north and west, is undoubtedly modern. The hall was so much crammed with drums and tabours that it was with difficulty that we could move in the interior. The shrine door is a patch work of odd pieces, mostly of an old door-frame, probably the original itself. But these pieces, instead of being arranged methodically, are anyhow thrown into the walls. Other sculptures are also stuck into them, and one such is a small image of what even the pujārīs had reluctantly to admit to be a thīrthamkura. The architrave again, resting on two pillars of the sabhāmandapa immediately in front of the shrine, is a devlī, i.e., a memorial stone bearing the sculpture of a warrior mounted on his horse and an inscription recording that one Khemarāja died in (V. E.) 1029=

- A. D. 972. The exterior of the shrine is all modern plaster work, excepting the images in the niches (Photo. No. 3507). These are unquestionably old, perhaps as old as the pillars of the hall themselves. All these except Siva have two hands each, another indication of their early age. All these are so thickly bedaubed with red paint that it is not a little difficult to recognize them. In the principal back niche is a goddess with two hands, her right holding a sword and the left a shield, and with her vehicle the lion close beside her. In the principal niche facing the north is Mahishāsuramardinī with two hands, her right holding apparently a skull and the left a sword, and trampling upon the demon. In the remaining central niche is Siva with eight hands, one holding a spear bearing a victim transfixed on its end. He also bears the elephant hide. It reminds one of a similar figure in the temple of Kailāsa at Ellorā. This figure is, however, mistaken by the people for Bālājī or Hanūmān. The other figures sculptured are of the regents of the quarters. But Vāyu is stuck up at the north-east, instead of at the north-west, corner, and Agni is placed twice over, one rightly in the south-east corner and once wrongly in the north side. This shews that the outside walls of the shrine have been rebuilt.
- 32. The lower parts of the pillar shafts of the sabhāmandapa contain inscriptions engraved on them, which are important for the history of the imperial Chāhamāna dynasty (Insers. Nos. 2509-13). The earliest of these is dated V. E. 1162, and refers itself to the reign of Prithivideva, who is undoubtedly here Prithivīrāja I. It records the rebuilding of the temple by one Hathada, son of Mohila. Two inscriptions bear the date Samvat 1196, and belong to the reign of Armanaia, the same as Armanāja son of Prithivīnāja I. and belong to the reign of Arnnaraja, the same as Arnoraja, son of Prithvīraja I, and contemporary of the Solanki king Kumārapāla. A fourth inscription says that in Samvat 1230 during the reign of Somesvara, i.e., the Chahamana sovereign Someśvara, Alhana, son of Udaïrā, rebuilt the mandapa of the temple. A fifth inscription is dated Samvat 1382 varshe Chaitra sudi 6 Soma-dine, when the king Mahamadasāhi was reigning. Then one thakura Vichuchchhāja, son of thakura Daipati, of the Lohațăni family, we are told, rebuilt the Jinideharā, i. e., temple of Jini. Lohatāni is probably identical with Nāṭānī, a khāmp or surname found both amongst the Khandelvāl and Mahesarī mahājans. Mahamada-sāhi of this epigraph is obviously Muhammad Tughlag. A sixth inscription begins with the date Samvat 1520 varshe Bhādravā sudi 2 Somadine, and records the obeisance of one thakura Iradasa, of the Mamnikabhandarī family. Mānak-bhandārī, as it is now written, is still found as a got in the Mathur Kayastha community both in Jodhpur and Jaipur. A seventh inscription gives the date Samvat 1535 varshe Sake 1399 Ashādha sudi 15 Somadine, and speaks of the temple of Jini as having been renovated. There are a few more inscriptions here, which are, however, too insignificant to be noticed. It will be seen from the inscriptions that the temple of Jin-mātā, or of Jini or Jini as she is therein called, was thrice rebuilt-once about the middle of the 12th century, the second time in the first half of the 14th century, and the third time about the close of the 15th century.
- 33. Behind the temple of Jin-mātā there is an underground passage leading to a subterranean chamber, which contains the image of what is known as Bhamyrā-kī-mātā. In front of her on the ground is a bust of brass said to be the head of Jagde Pavār offered by him to the goddess. Close by is a lamp which is kept burning for ever. Above the entrance to this chamber is built into the wall a lintel which must have belonged to a Vaishnava temple. On the projecting block is Vishņu seated on Garuḍa, and above him are the Navagraha.
- the highest hill in the whole of Sekhāvātī. From the south of the village runs a rough path called khurrā for going up the hill, and which consists of nothing but large stones thrown into the ground anyhow. Most of them have become so smooth by constant wear that it is somewhat dangerous to set one's foot on them, especially when one is descending. The khurrā was made about 175 years ago, by Sivsingh, who was then the chief of Sīkar. It extends over two miles, and, after clearing it, one has to trudge over a distance of at least one and a half miles before he reaches the ancient ruins.

- Mahādeva or Harasnāth. Close beside it is the modern temple of Sivji, built by Sivsingh, the same chief who built the khurrā (Photo. No. 3508). This has a plain but stupendously high spire, which is seen even from a distance of five miles. To the south is a kuṇḍa built by a mahātmā called Nandrāmjī nearly 200 years ago. Still further to the south is the temple of Bhairavjī, which is built of materials from that of purāṇā Mahādeva. The pillars, especially at the entrance and near the cooking room of the pujārīs, are old (Photos. Nos. 3515 and 3517). The image of Bhairava is in an under-cell. But just before entering it may be seen on the right a beautiful image of an eighteenhanded goddess (Photo. No. 3516). A fair is held here on the 14th of the bright half of Bhādrapada, where people from the neighbouring places come. Near the south-west corner of this temple are gathered together heaps of broken images and sculptures.
 - Let us now turn to the temple of purana Mahadeva, with which we are here principally concerned. It was once a magnificent temple as will be seen from the mass of ruins scattered on all sides, and it is indeed a sad thing to see it now an almost utter wreck. In the porch of the temple (Photo. No. 3513) is a large slab of black stone on which an inscription is incised (Inscr. No. 2514). This has been edited by Prof. Kielhorn in the Epigraphia Indica, Vol. II, But as he had no local knowledge of the temple, some mistakes are to be found in his translation of it. From the inscription we learn that the god was Mahādeva known by the name of Harsha, after whom the mountain was also called Harshagiri. The temple was built by one Bhāvarakta alias Allata in V. E. 1013 = A. D. 956. Verse 12 describes what the temple was like, and is consequently important for our purposes. As Prof. Kielhorn's translation of it is not satisfactory, I give here mine:—"Glorious is the mansion of the divine Harshadeva, which is charming with the expanse of (its) spacious hall (mandapa) exquisite with the splendour of gold shells, (and) lovely in consequence of (the statues of) Vikață and the sons of Păndu set up in the row of structures along (its) sides. Resembling (in height) the peak of Meru, it is pleasant on account of an excellent arched doorway (torana-dvāra) and a well-carved bull (Nandī), and is full of manifold objects of enjoyment." A long flight of stairs leads to the courtyard of this temple. Just where these stairs end are the shafts of two pairs of columns one in front of the other, which were no doubt surmounted by a torana and formed the arched entrance, as stated in the verse. A little further on, on a raised terrace is an old marble image of Nandi, once no doubt placed in a pavilion, of which the plinth only has survived (Photos. Nos. 3509-3510). This is unquestionably the bull referred to in the inscription. It also says that there were other structures also on the sides of the temple, and that in one of them were the images of Pandavas and Vikatā. That there were these structures is clearly proved by the ruins of the subsidiary shrines on the south and south-west. The images of Pāṇḍavas also may be easily recognized in the ruins on the north-east. Here are six colossal images, as high as seven feet almost, which are to this day said by the people to be those of the Pāṇḍava brothers and Draupadī (Photos. Nos. 3520-3522). I do not know whether Vikațā stands here for the ogress Hidimbā. figure here is, however, that of an ordinary woman, and not that of an ogress. But Hidimba, it must be remembered, had changed herself into a beautiful woman and then married Bhima. And the figure in question may represent Hidimbā when she was in this condition. Of the remaining figures, there are two which bear a bow and arrows. One of these has a crown. This must be Arjuna, and the other either Nakula or Sahadeva. There is a third figure which holds a lotus flower in his right hand and retains his left on his hip—an almost conventional attitude in which kings and personages of importance are represented in old sculptures. Besides, the figure bears an elaborately ornamented crown. I have no doubt that this is Dharma. There is a fourth figure which is shewn as robust and stalwart and trampling upon demons. Though the head of the figure is missing, it will not be unreasonable to say that this represents Bhima. The inscription states that the statues of the Pāṇdava brothers were placed in one of the structures on the outskirts of the temple. These images are all lying on the north-east of the temple but there

I.

1

are no traces of any old structure spacious enough to contain them. Perhaps there was one formerly on this side, on whose site the present temple of Śivjī may have been built.

- 37. The spire of the temple is completely gone (Photo. No. 3514); and the exteriors of the sabhāmaṇḍapa and the shrine also are no better. Only Kubera of the outside walls of the shrine is preserved. What is most curious about him is that his vāhana is shewn to be the ram (cf., however Ind. Ant. Vol. VI, p. 361). The interior of the shrine, which is on a lower level, is accessible by a small flight of stairs, and contains an old linga with four faces, one on each side (Photo. No. 3511). The inside walls also are carved with no less than seventeen figures. The central figure on the west wall represents some form of Gaurī, with two hands, the right holding a linga and the left an image of Gaṇapati, and herself standing on a lizard.
- 38. I have already said that the ruins of the temple of Harsha and its subsidiary shrines have served as materials for building the adjoining temples of Sivjī and Bhairava. Amongst these may be found many figures which are interesting from the iconographic point of view. The image of an eighteenhanded goddess has already been alluded to. Another sculpture, which is built into the south wall of the temple of Sivjī represents Brahmā and Vishņu as attempting to fathom the linga of Siva (Photo. No. 3519). Such sculptures are both rare and early; and, so far as my knowledge goes, two such exist in the temple of Kailāsa at Ellorā and on the temple of Virūpāksha at Paṭṭadakal. In a niche of an attendant shrine facing the south is a third sculpture, which I for long took for a representation of Kalkī, the last avatāra of Vishņu. But as clearly shewn by Paṇḍit Bidyābinoda, he is to be identified not with Kalkī, but with Revanta, son of Sūrya (Journal and Proceedings, Asiatic Society of Bengal, Vol. V, No. 10, 1909) (Photo. No. 3523).
- The inscription states, as said above, that the temple was constructed by Allata in V. E. 1013 = A. D. 956. We have been informed who this Allata There was a devout worshipper of the god Uttareśvara named Viśvarupa, who was of Pancharthalakulamnaya, which Prof. Kielhorn took to be equivalent to Pancharthala-kul-amnaya. The name Pancharthala consequently puzzled him, and he somehow or other explained it by saying that it was the same thing as Pañchārthika. But this is a mistake. The expression must be understood to stand for Panchārtha-Lākul-āmnāya. Viśvaiūpa was thus an ascetic of the Lakulīśa-Pāśupata sect. I have elsewhere shewn that the phrase Lākul-āmnāya occurs in Mysore inscriptions, and the word Panchartha, which is conjoined thereto, is a technical term to the philosophy of this sect and has been explained by Sayana in his Sarvadarsana-samgraha in the section dealing with Lakulīśa-Pāśupata-darśana. Viśvarūpa's pupil was Praśasta, and the latter's disciple was Bhavarakta alias Allata. He is said to have originally belonged to a Brāhmaņa family called Vārgatika residing at Rānapallikā, which is spoken of as his Samsārika-kul-āmnāya. Rānapallikā has been rightly identified by Kielhorn with Ranoli, 7 miles east of Haras. But the Sanskrit expression has been misconstrued by him. For he takes it to mean "Where the hereditary doctrine is that of the Samsārikas," whereas what it really means is that his Samsārika or wordly, as opposed to his spiritual, family was at Rāṇolī. There is thus no reference here to a sect called Samsārikas, as Kielhorn supposes. Allata was alive when the temple was constructed in A. D. 956. In fact, it was he who built the temple with the wealth received from the pious people. Allata died in V. E. 1027 = A. D. 970, and was succeeded by his pupil Bhāvadyota. It was in his time in V. E. 1030 = A. D. 973, that the inscription was put up. In verse 27 we are informed that Harsha was the tutelary goddess of the Chāhamāna family. It is, therefore, no wonder that many of the grants made to this god, which are recorded at the end of the epigraph, were made by the Chahamana kings. The inscription refers itself to the reign of Vigraharāja, but his father Simharāja was alive when the temple itself was erected. It is on this supposition only that his grant of two villages to the It is on this supposition only that his grant of two villages to the god Harsha becomes intelligible. Professor Kielhorn has done full justice to the account of the Chahamana family given in the inscription except in one The first prince mentioned is Guvaka I, who in the record is stated to

have been looked upon as a hero in the assembly of the king Nāgāvaloka. At the time of editing it, he did not take Nāgāvaloka as one name, and supposed that the king was a Nāga prince. This mistake he afterwards corrected, but was not able to suggest who this sovereign was. I think, in the first place, that this Nāgāvaloka is identical with the prince of that name mentioned in the Paṭhārī inscription of A. D. 861, and secondly that he was the same as Nāgabhaṭa, son of Vatsarāja, of the imperial Pratīhāra dynasty. This point will be made clear in a separate paper which I mean shortly to write.

- 40. The inscription informs us that the temple was built by the sūtradhāra Chaṇḍaśiva, son of Vīrabhadra. The same thing is told in a short inscription of three lines on a piece of column in the hall immediately in front of the shrine (Inscr. No. 2515). In fact, this column is made of three different pieces, and does not represent a single whole original pillar of the sabhāmaṇḍapa. Other columns and the shrine also shew that the temple was at some time rebuilt. Another small inscription on a pillar begins with the date samvat 1535 varshe Āshāḍha sudi 6, refers itself to the reign of Sulātāna Gyāsadi, i. e., Ghiyās Shāh Khaljī of Mālwā, and specifies the names of some masons, such as Udhā, Kolbā and so forth. The date Samvat 1535 = A. D. 1478 shews that the temple was reconstructed in he second half of the 15th century.
- Raghunāthgadh is fourteen miles north-east of Sīkar and comes under the same principality. The place is popularly known RAGHUNATHGADH. as Khoh, because it is situated in a gorge formed by The fort here was built by Devisingh, an old chief of Sikar,—the same Devisingh who constructed and after whom was named the fort of Devgadh, which is in the vicinity of the Harsha mountain. There are temples of Raghunatha both on the fort and in the village below. This is the reason why it is called Raghunathgadh. There is an old deserted rebuilt temple of Mahadeva in the village (Photo. No. 3826), which was originally not later than the 12th century. Not far from the temple is a marble image of Mahishāsurmardini (Photo. No. 3527). Near a well not far from the dharmaśālā is a tīrthamb. It bears an inscription with the date V. E. 1150 and referring itself to the reign of a Chandel king. According to local traditions, this part of Sekhāvātī was first held by Chandelās, then by Dāliyās, then by Nirvāns, then by Taknets and lastly by Sekhavats. Reminiscences of Taknets are still preserved in the sanads issued by Alakkhānji, son of Nārāyandāsji, but remains of earlier times had not so long been discovered. And the tirthamb inscription is the first record so far found of this earlier period, and shews that the local traditions are correct in saying that this land was once possessed by the Chandel Rajputs.

III.

Eight miles from Raghunathgadh and ten miles south-west of Udenur is Lohagar, a place of great sanctity in Sekhāvāţī. LOHAGAR. There are two mahatmyas connected with this place. One is called Padma-purane Lohargala-shattīrtha-māhātmyam and the other Sāroddhāre Lohārgala-māhātmyam. The latter is important, and has been published. It calls the place by the name of Lohargala, and tells us that this is the name of the mountain and that it was so called because it stood like loha (iron) as an argala (bar). Lohārgala, however, as it is understood by the people, is the name of the tirtha here, the mountain itself being called Malket. In the māhātmya also the true name of the mountain given is Mālaketu, son of Sailendra who was himself a son of Himalaya. There is actually a temple here on the top of a hill dedicated to this Malket, where he is represented to be seated and with two hands, one holding a rosary and the other left open. In the mahatmya it is also stated that after slaughtering the Kauravas, the Pāṇdavas, in order to free themselves from the sin of gotra-hatyā so committed. went out in search of tirthas. They had been told by Narada that when the mace of Bhima would become druta (liquified), they were to suppose that their sins were washed off. So in the course of their pilgrimage they came here, and the mace of Bhima became liquid at the touch of the water of a well, which has since been known as gyān-kuvā. This mace was of iron, i. e., loha, and it was liquified, i. e., gal gayā. Lohāgal was. therefore, the name by which, according to the popular account, the place became known.

- Fairs are held here twice a year—once on Vaisākha sud Pūnimā and another time Bhādvā vad Amāvas. The second is more important, and the pilgrims who come are expected to make a parkammā or circumambulation round the mountain. They first come to Lohagar on the 10th or 11th of the dark half of Bhadrapada. They commence bathing in Surya kunda, then bathe in Chitravati-Ganga, a small kunda behind it at the foot of a hill, and afterwards in Brahmahrada near gyānkuvā. Then they go to the Triveni, consisting of the junction of the three rivers Karkotakā, Samdhyā, and Śarkarā, and bathe there. Thence they repair to the village Kerodī, where they bathe in two kundas, one of hot and the other of cold water. From there they go to Sakrāi, bathe in the Sarkarā river, and do obeisance to the goddess Sākambharī. Then they go to the river again, and perform ablutions. They afterwards go to Khoh kunda, and do worship to Rāvaņeśvara-Mahādeva. From there Nāga kuṇḍa is reached, and from Nāga-kuṇḍa they go to the river Sobhāvatī and thence to Khori kuṇḍa. At all these places they bathe. From Khori kunda they come back to Sūrya kunda at Lohagar, where they must be present on the 14th as it is the principal The circumambulation thus extends over twenty-four kos, and has to be finished in five days at the most. With Lohagar are intimately connected the Mahesari, one of the well known bania classes of Rajputana. The history of their origin has been told in the Itihāsa Kalpadruma. When Khandelā was in the possession of the Nirvān (Chohān) Rājpūts, a certain king called Khadgalasen was once reigning. His son Sujān Kamvar was a convert to Jainism, and always prohibited Brahmanas from performing sacrifices. The king, therefore, without specifying any reason, forbade him to go to any place north of the city. Once, however, the prince, attended by seventy-two sons of noblemen, did go out on a stroll on the north of Khandela, and to his surprise found six sages including Gautama engaged in a sacrifice. It then suddenly flashed upon him that this was the reason why he had been forbidden to come here, and he at once ordered his companions to put an end to the sacrifice. The moment, however, they approached the sages to seize and destroy their sacrificial materials, the latter cursed them, and they were all, including the prince himself, converted into stone. On hearing of this, the king of Khandela died, but the wives of those turned into stone repaired to the place, and commenced performing religious austerities in an adjoining cavern. After a time Mahadeva and Parvati happened to pass by They all came out, and fell at their feet. Through the intercession of Pārvatī, Mahādeva restored their husbands to their original life, but the weapons which they originally had with them stuck to their bodies. Mahādeva, therefore, ordered them to bathe in the Surya kunda. The effect of its water was such that the weapons were separated from their bodies, but they had also been well-nigh dissolved and were consequently unfit for any use. Mahadeva, therefore, asked them to exchange their martial for commercial pursuits. Hence their descendants, who were Mahesaris, became traders and merchants.
- From Raghunāthgadh I proceeded to Sakrāī, which is twenty miles distant vid Udepur. It is the same Sakrāi that is refer-SAKRAI. red to above in the description of the circumambulation which pilgrims make round the range of hills known as Malket. Here is a temple of Sakambhari situated in the midst of one of the thickest jungles of Sekhavati and standing by a rivulet called Sarkarā, after which the place is named Sakrāī. The outside walls of the shrine are doubtless old, and cannot be later than the second half of the eighth century. But no other portion of the ancient temple now survives, except two or three pillars (Photo. No. 3528). In a corridor wall of the front entrance has been stuck an inscription which ends with the date Samvat 879 dvir-Ashādha-sudi (Inscr. No. 2517). The reading of the first cipher of the date, v.z., 8, is certain, but I am by no means sure regarding the two following ciphers, as they are entirely new and not known to us from previous records. The inscription records the erection of a mandapa by certain goshthikas in front of the goddess Sankarā. This, no doubt, appears to be the correct and original name of the goddess, and not Sakambhari by which she is at present known. One of the goshthikas, i. e., members of the temple supervision committee, was the Śreshṭhī Maṇḍana of the Dhūsara family. The surname Dhūsara is still wellknown in the Jaipur State, but persons bearing this surname call themselves Bhargava Brahmanas, though they are suspected by the people to have been originally banias. But the popular suspicion, I think, is shewn to be a fact

II.

by our inscription, for Mandana Dhūsara is called a Śreshṭhī, i. e., Śeṭ or Śeṭh, which title is borne by none but the bania class. Another gosthika of the temple was the Śreshṭhī Garga of the Dharkkaṭa family. I have shewn elsewhere that the name Dharkkaṭa has survived in the slightly altered form Dhākaḍ, a sub-division of the Osvāls. Curiously enough, the initial portion of this inscription is also worth pondering over. It invokes the blessings of three deities, first of Gaṇapati, next of Chaṇḍikā, and lastly of Dhanada, i. e., Kubera. It is worthy of note that here Chaṇḍikā is placed between Gaṇapati and Kubera, and no doubt reminds one of the figures on the pedestal of the shrine of Piplād mātā in Osiā. Of these last the central figure is that of Mahishāsuramardinī, a form of Chaṇḍikā, and she is flanked by Kubera and Gaṇapati on the right and left respectively. When I was at the temple in Sakrāī, I was not allowed to go into the shrine and inspect the images, which were well-nigh concealed under garments, but I was simply told that the goddess was Mahishāsuramardinī, and had none by her sides.

- 45. There is yet another old inscription which also requires to be noticed, though briefly (Inscr. No. 2518). It is engraved on a slab which is somewhat mutilated, and which, what is worse, is coated with a whitewash, with the result that many letters have thus become illegible. The slab is now placed in the principal niche of the exterior of the shrine facing the north. And as a cattle-pen has been put up against the north wall of the temple, the inscription stone is practically in the dark. It is, therefore, no easy task to read this inscription. It apparently refers itself to the reign of the Chāhavāṇa king Vigraharāja, and records that Dayikā, queen of Vachchharāja, i. e., no doubt of Vatsarāja, uncle of Vigraharāja, as we know from the Harsha inscription, repaired the temple of Saṅkarā-devī, which was situated in a brihad-dronī, i. e., in a large valley between two mountains. This is, no doubt, the case with the temple, as it is. The inscription ends with the date Sañvatsara 55 Māgha śudi 5. It is indeed curious that the date is here specified with the hundreds omitted. But we know from the Harsha inscription that Vigraharāja was living in V. E. 1030. The full date of our record, must, therefore, be 1055.
- khandela. by two jahāgirdārs. It is also twelve miles north-west of Srī-Madhopur, a railway station on the Rebhārī-Phulerā chord line. Khandelā possesses a distinct celebrity for being the cradle of a class of Brāhmaṇas and also traders called Khandelvāl. But now there is only one house of Khandelvāl Brāhmaṇas and thirty of Khandelvāl mahājans. It is said that no less than 750 bahels (two-wheeled carts for ladies of high family), to use the local phrase, left off the place nearly 800 years ago to escape the persecution of some Muhammadan emperor, whose name is not known. Similarly 350 tānkīs or stone-cutters left off, and the present well known stone-cutters at Makrāṇā and Pidwāṇā are believed to be their descendants.
- The only objects of antiquity that now survive here are (1) the temple of Khandesvara-Mahadeva, (2) a Sravgi temple, (3) Munji-ka-mandar and (4) some old wells. The first, though doubtless called after the source from which the name Khandelā is derived, is really a modern temple built of old materials (Photo. No. 3530). The second temple is doubtless old, but is dilapidated (Photo. No. 3529). Nothing of it has been preserved which is characteristically Jaina, and it is, therefore, inexplicable why it is called a Srāvgī temple. It cannot be later than the tenth century. With regard to the third temple Munjī the name of the god, to whom it is dedicated, is really an abbreviated form of Mohanji. He had at first a spacious temple erected for him, but it was demolished and converted into a mosque by the Muhammadans. This mosque is now close by the palace of the Badā-Thikānāwālā. When his temple was destroyed, Munji, it is said, was pleased to come of himself and stay in the present place, though the latter, as admitted by all, was a Śravgi temple. image of Munji is not in the shrine proper, but in a niche of the sabhamandapa close beside the shrine door. Outside the sabhāmandapa are two images, one of Seshaśayi and the other of Kubera, whose head is, however, broken off (Photos. Nos. 3533-3534). These are loose images and were brought thither from elsewhere. Kubera holds in his right hand a drinking pot and in his left what is commonly supposed to be a money-bag. Might this last be a wine flask?

48. According to local traditions, old Khandelā was situated near the foot of the hill to the west of the present town. But no ancient structure is now existent there. Sculptures of the temples, that once stood here, may, however, be seen built in some wells known as Udāvlā, Rāmkuvālā and so forth (Photo No. 3532). But the well called Chintāman-kā-kuvā is supposed to be the most ancient. It is said to have been built by a king named Chintāmani, who had received a boon from a saint in accordance with which whatever he wished for was at one actualised. Khandelā was also once held by a Sekhāwat called Rāysaljī, who flourished before V. E. 1600. He had a queen, who was the daughter of the chief of Jālor. She was thus a Sonagarī, and consequently the step-well built by her is now known as Sonagrī-kī-bāy (Photo. No. 3531).

III.

- 49. Old sculptures of mediæval times are found everywhere in and outside the town of Khandelā. But of these that are noteworthy one is lying loose in the temple of Kisandevjī outside Khandelā (Photo. No. 3537), another is built into the wall of Paūcko-kī-thāī (Photo. No. 3536), and a third is on the steps leading to Narsingjī's temple (Photo. No. 3535). This last piece is interesting. The principal and central figures are a man and his wife, most probably some king and queen, as there is a nimbus behind the head of each. The piece, in all likelihood, originally belonged to some temple built by them. But it must have been a Jaina fane, as shewn by the figure of a Jina with which the sculpture is surmounted. The lowermost part is occupied by a group of seven persons who no doubt at first sight appear to be Saptamātri but are not so, as a matter of fact, because they are clearly males.
- 50. Four miles to the north of Khandelā is Saladdīpurā, a village owned by saladdīpura. the Chhotā-pānā. About a mile from the village is an old temple of about the twelfth century, believed to have been built for the spiritual merit of the two sisters Sobhal-de and Ābal-de. They were the daughters of the Chohān sovereign Vīsala. They had gone on pilgrimage to Lohāgar, disguised as males. But they were seen and detected by the prince of the chief of Soler, the old name of Saladdīpurā. Both fell in love with the prince, and were taken off by him to Soler. Thereupon Vīsala, being enraged, marched off to attack the chief. He encamped at a place now known as Bīsalo-jodā (tank of Vīsala). The chief and his son were killed in a well-pitched battle, and the daughters of Vīsala died as satīs. And in their memory, it is said, the temple was erected by the penitent father.
- The temple faces the east. Above the shrine door on the dedicatory block is Siva standing with four hands, two playing on the guitar, one right holding II. the trident and one left a snake. On his proper right at one end is Ganapati standing, and on his left is the goddess Vaishnavi. The door jambs are sculptured with the remaining Saptamātri. Above on the frieze are the Navagraha. Inside the shrine is now placed a modern image, the original having disappeared. This modern image is of Jamāi mātā, the tutelary goddess of the Sekhāwats. The exterior of the shrine contains three central niches, one on each side. That on the north face is occupied by Vārāhī, with six hands. The lowermost right hand is left open; the one above it holds a dagger and the uppermost a trident. The lowermost left hand bears a skull-crowned mace, and the middle a bowl; the uppermost apparently clutching her own hair (Photo. No. 3539). In the southern niche is Chāmundā, who is always represented as a hag with breasts fallen. She has eight hands, bearing, to begin with the lowermost right hand (dakshin-ādhah-kara-kramāt), (1) a rosary, (2) a dagger, (3) a bowl, (4) a drum, (5) a snake, (6) resting on her breast with one finger in the mouth, (7) a human skull and (8) a skull-crowned mace respectively. The remaining, i. e., the back, niche also contains the figure of a goddess with eight hands. Of the left four, the lowermost is open, the second wields a dagger and the third a trident, the uppermost bearing a drum. The lowermost right hand holds a skull-crowned mace, the second a snake, the third some unidentifiable object, and the uppermost a bowl (Photo. No. 3538). What is curious is that all these goddesses have the man as their vahana or vehicle. The outside walls of the shrine are also decorated with the figures of the Ashta-Dikpālas or the Eight Regents of the Quarters. Of these Kubera is shewn with the ram as his vahana as we have seen in the case of the Harsha temple

above; Nir-riti's vāhana here is the man, and not the dog, and besides, he is not here sculptured as naked; Yama is represented with two hands, of which the left holds a skull-crowned mace.

52. My tour for the last season in the Sekhāvāṭī province and so in the Jaipur State came to an end, and we prepared ourselves to resume our exploration work in the Jodhpur State. But before actually going there, I seized this opportunity of visiting Ajmer in order to see whether any new additions were made to the Archæological Museum there. Till the 2nd of March when I left Ajmer, only three new inscription stones had been received. Of these, two had been brought from Pushkar and one from Byana. Of the former, one was a long stone containing an inscription of thirty-one lines (Inser. No. 2519). It really records two separate grants, one by Malhana, son of Bhatta, and the other by a king named Durgaraja. The first grant is dated Samvat 982 Māgha [su]dī ekādasyām, and consists of a portion of a field called Khātakshetra within the precincts of the village Namdāgrāma on the west of Jyeshtha-Pushkara. Jyeshtha-Pushkara is called a tapovana, i. e., a grove in which religious austerities are performed. It is also spoken of therein as having been brought into existence by Brahma and as Vishnudharma-purana, i. e., old in [the practice of] the Vaishnava religion. It is worthy of note that Malhana, the donor, is called Pushkara-sāmānya, i. e., belonging to the Pushkar community. Pushkara Brāhmanas are at present known as Parāśaras. Malhana was thus, in all likelihood, a Parāśara Brāhmana. The date of the second grant cannot be properly deciphered, but it is certainly Sanivat 990 something odd. It was made by Durgarāja to the same god, i. e., Pundarīkāksha, on the occasion of a solar eclipse on the new moon day of Phālguna. But the nature of his grant is not clear from the inscription. The other inscription from Pushkar also appears to be a Vaishnava record (Inscr. No. 2520). It commences with obeisance to a god whose name is lost and to Svetadvipa. The name of the god ended with the letters svara and began with either pa or ya (more likely the latter); and in all consisted of four letters. The proper left side of the stone is completely gone, and the middle portion of what is preserved is It is a pity that this stone is not well-preserved, highly weather-worn. because it appears to be an important inscription. In lines 5-6 are mentioned Srīdhara and his son Vīṇāditya, who were of the Kautsa gotra. Line 18 contains a reference to the king Vākpatirāja, who is probably identical with the Paramāra Vākpati-Muñjarāja. In line 21 occurs the name Rudrāditya, who was a worshipper of Vāsudeva. He is perhaps the same as Rudrāditya referred to in line 13. The name of Pushkara is met with in line 23. The third inscription has been engraved on the image of a Jina found at Byānā in the Bharatpur State (Inser. No. 2521). It bears the date 1051 V. E. = 994 A. D., and says that the image was caused to be made in accordance with the instructions of būrasena of apparently the Vāgata-saingha by the three brothers, Siiihaika Yasorāja and Nonnaika.

JODHPUR STATE.

53. My tour in Marwar commenced with Phalodi, one mile distant from the Merta Road Station on the Jodhpur-Bikaner line. PHALODI. Phalodi and all other places I visited upto the end of March, are in the Medta (Merta) district of the Jodhpur State. It is celebrated for two ancient temples, one of Parsvanatha and the other of Brahmāṇi. Both are on the outskirts of the village, the first on the west, and the second on the east, side. The image of Parsvanatha, it is said, was found beneath a ker tree, and is composed of sand. A certain Jaina had given his cow to a herdsman for taking out for grazing. But to his surprize he found that the cow, when she returned in the evening, gave no milk. He scolded the cowherd several times but to no purpose. Resolved upon ascertaining what the fact actually was, he once dogged the footsteps of the herdsman and his cow. He watched the cow separating herself stealthily from the drove and going to the There she raised one of her hind legs and lo! milk of itself foot of a ker tree. flowed from her udders. Curious to know on what substance the milk fell, he approached the tree and found this image of Parsvanatha wet with it. The image was removed amidst great rejoicings and enshrined in the present temple,

- inage formed itself from the sand particles and the milk of the cow. Every third or fourth year, I was told, some special kind of drugs and spices was applied to the image to guard it from the effects of weather. And to minimise the effects of moisture, it is always covered with a silver case divided in two parts. To these and not to the inside image saffron is applied, and these are every day taken out and clean washed. The image is thus altogether left untouched. In the month of Āsoja (Āśvina) a great fair is held, and, since the opening of the rail, pilgrims from distant parts of the country flock to this place. The person, who contributes highest to the maintenance of the ghī lamp in the shrine, has the right to wave lights before the idol. No less than Rs. 1,200 is annually collected from the pilgrims. A portion of this income is now being devoted to painting the sabhāmandapa, which, however, is a thing to be regretted. The finances of the temple are controlled by a panch, who stay in Medtā, and spend the remainder on repairs to the twelve Jaina temples there.
 - 54. In front of the shrine on each side is a white marble slab curiously sculptured. Each has an inscription on it. One of these is dated Samvat 1221 Mārggasira sudi 6, and speaks of a gift of Chamdaka together with Srī-Chitra-kūṭīya-Silaphaṭa in the temple of Pārśvanātha in Phalavardhikā (Phalodī). The gift was made by the Porvāḍ Ropimuṇi and bhamḍārī Dasāḍhā. The other inscription bears no date, and records the sculpturing of uttānapaṭṭa by Seṭh Munichamdra. The meaning of Chamdaka, silaphaṭa, and uttānapaṭṭa is unknown to me. Munichamdra is spoken of as having also constructed the manḍapa of the temple, in Naravara, built by Sallakshmaṭa, and as having placed deva-vā(bā?) lakāḥ in the temple of Mahāvīra at Ajayameru (Ajmer). In an antechamber to the sabhāmanḍapa are placed some sculptures in wall niches. Two of these are interesting. They are Samavasaraṇa and Nandī-śvaradvīpa (Photos. Nos. 3549-3550). Their interest lies in the fact that they are modern sculptures of them, and are widely different from their old representations.
 - 55. The pujārīs of this temple are Sevaks as of most Jaina temples, but what is wonderful is that they are pujārīs of the temple of Brahmāṇī also. They hold some lands as jahāgirs, granted by a Rāṭhoḍ king, but do not remember the name of this king. Their ancestor came from Jhāliwāḍī, a village not far distant. They have now no less than sixty houses here.
 - The temple of Brahmani faces the east, and appears to be an eleventh century structure. In front of it stands a raised dais and a torana as in the case of the temple of Harasnath (Photos. Nos. 3545-3546). Here, however, on I. the dais is a broken figure of the lion, that has probably fallen from the original sikhara. The exterior of the sabhāmandapa is modern work, but the pillars inside are old. The spire of the shrine is new, but the outside walls, ancient and plain but for three niches. That facing the north contains Narasimha and that on the south, Varāha (Photos. Nos. 3543-3544). The back niche is occupied by a goddess with eight hands, six of which are now gone and two may now be seen holding a shield and a thunderbolt (Photo. No. 3542). stands between two lions and two female attendants. She represents, I think, the Phalavardhikā-devī of the inscriptions in the temple, the goddess to whom the temple was originally dedicated. The present image of Brahmani is modern, and there is nothing in it that stamps it as one of Brahmāṇi. To the south of this temple and in the close vicinity of it is another, which is rebuilt of materials of a somewhat older fane (Photo. No. 3541). It also faces the I. east, and has only three principal niches, containing Kubera, Trivikrama and Ganapati on the north, west and south respectively. The parts of the original sikhara, that are preserved, are deeply carved and cannot be later than the tenth century.
 - 57. The pillars of the hall of the Brahmāṇī temple have many small inscriptions engraved on them. But excepting perhaps three, none is in any way important or interesting. The earliest, which is without date, commences with obeisance to Phalavardhikā-devī, and specifies the name of a sūtradhāra called Sivaravi, son of Machāravi, grandson of Bhadrāditya, and great-grandson

of Bālhaka. He was a resident of Kachārī, which was in Pushkaranī, perhaps the province of Pushkar (Inscr. No. 2522). Below the inscription is incised the name of Sanāḍhā Kāpaḍī. Kāpaḍī, I think, is the same as the Sanskrit kārpaṭīka, a mendicant. Another inscription, which is dated Sanvat 1465 varsha Bhādavā sudī 5, refers itself to the reign of some Muhammadan emperor simply called here Mugalā-sāha Pātasāha, and says that the temple of Phalaka (Phalodī) was repaired by one Doṭhā, a Guhilata, i. e., Guhilot. The third inscription is entirely in old Mārwārī. It gives the date Sanvat 1535 varshe Chaitra sudi pūrnimā, and states that the temple was rebuilt by three persons, viz., Jaitā a Hul, Satā son of Pīthā and Hārākhu a Rāṭhoḍ. Hul is a sub-division of the Guhilot tribe. In fact, the whole of the Meḍtā province was once held by the Guhilots as is evidenced by the devlīs or memorial stones found and the traditions current here.

- Four miles south-east of Phalodi is Pandukha, which can be called a village only by courtesy. Outside the village is an old well, built of materials of old temples. tion had been given to me by Nannuram Brahmabhat of Jodhpur that of of its outside walls at the entrance contained an inscription slab. The slab was there, but the inscription was too weather-worn to be read completely and with It begins with several gods and goddesses. Amongst the latter the names of Vadavāsini, Pāmdavakshāti, Vachatushā and so forth are utterly unknown to me, and they must represent some local deities. The inscription then refers itself to the reign of Alavadi, i. e., Ala-ud-din, of Joginipura, i. e., Delhi. He had established at Medamtaka, i. e., Medtā, probably as viceroy one Tājadī-alī (Tāj-ud-dīn Ali), whose long Persian titles have been given in Sanskritised form. Then is given the date samvatsara 1358 Vaišākha vadi 6, and we are told that a step-well was constructed by one Pithada, son of Vighata, a Mathura-Kayastha, near the temple of the goddess Pandavakshati. As a matter of fact, there is a small shrine of a goddess in the close neighbourhood of the step-well, but the goddess is called simply mātā. Her true original name, however, must have been Pandavakshati, after whom the village also seems to have been called Pāndukhā.
- of the district of the same name. The present town was founded by Dūdhājī, son of Rāv Jodhājī in A. D. 1488, and the memory of this prince is still preserved in the name of a small sheet of water called Dūdāsir. In about A. D. 1556 Rāv Māldev wrested it from Jaimāl Meḍtiā, grandson of Dūdhā. Subsequently it fell into the hands of Akbar, who granted it to Mahārājā Sūrsingh of Jodhpur. But long before it was seized by the Rāṭhods, Meḍtā was in existence and was known by the name Meḍantaka. We have just seen that the Pāṇḍukhā inscription speaks of Meḍantaka as being the seat of Alā-ud-dīn's viceroy. But the earliest reference to Meḍantaka is to be found in the Jodhpur inscription of the feudatory Pratīhāra chieftain Bāuka and dated V. E. 894 = A. D. 837. Therein Nāgabhaṭa (circa 700 A. D.), one of his predecessors, is represented to have made Meḍantaka his capital.
- 60. Medtā was thus undoubtedly an old place, but very few objects of antiquity are now extant there. In fact, beyond two eleventh-century pillars and a few sculptures in the temple of Lakshmī, about a mile to the north-east of the town (Photos. Nos. 3551-3553), there is hardly anything of the pre-Muhammadan period to be seen here. But there are many structures of the Mussalman times, mostly masjids. Three of these were built by three different castes, viz., Mochīs (shoe-makers), Ghosīs (milkmen), and Silāvats (stone-cutters). The Mochī masjid contains a Persian inscription,* which actually tells us that it was built by all the Mochīs of Medtā in H. 1086. But the most important of these all is the Jamī masjid which is situated in the bazaar and in the centre of the town. A sanad in connection with it is still in the possession of a Muhammadan here. It was issued by Sayyad Alam

^{*}The account of the Persian records here given is based on their summary so kindly prepared for me by Munshi Devi Prasad of Jodhpur.

в 640-16

Ali Khān Bahādur, servant of Mohammad Shāh Bādshāh Gāzi, who was a great-grandson of Aurangzeb. It was issued to Shāh Sayyad Mohammad Turk, son of Sayyad Mohammad Musā Gilāni, in the family of Shāh Abdul Vahal, son of Sayyad Shāh Abdul Kādir Gilāni. Vahal was a pīr of great celebrity in Baghdād. His descendants first came to Nagaur, and thence to Meḍtā. Aurangzeb had issued a farman to Mohammad Turk for the rent of the shops of this Jāmi masjid. But at the time when the sanad was issued, the Hākims of Meḍtā had discontinued giving the rent for the use of the masjid. Hence it had to be renewed. On the pillars of the masjid itself there are two inscriptions, one in Persian and the other in Mārwārī, but both of the same import. They say that it was constructed by Aurangzeb Alamgir, that it had fallen into disrepair and the rent of the shops ceased to be sent to its custodian, but that in H. 1222 or V. S. 1864 the masjid was repaired by the orders of Dhokalsingh Bahādur and the Sardārs of Nokoṭī Mārwār and the rent was continued to be paid again.

- I have already said that there are no less than twelve Jaina temples in Though they are modern structures, still the inscriptions contained in them are not without interest. Almost all are engraved on the charana-choki or seats of the images of Tirthamkaras. Most of these, it appears, were installed in V. E. 1677 = A. D. 1620. One of them, e. g., is in what is known as Chapdā-ro mandir. It commences with the date Samvat 1677 Jyesh!ha vadi 5 Guruvāre, when Jahangir was pātasāhi or supreme ruler and Sāhijahām, i. e., Shah Jehan, was sāhiyādā or heir-apparent. It records the setting up of an image of Santinatha by one Asakarana in the temple erected by himself and called Mammāṇīmaya-vihāra. He was an Osvāl and of the Chopadā gotra. It is no doubt this surname that accounts for the temple being now called Chopdā-ro mandir. His wife's name was Ajāiba-de, a rather curious name, derived from the Persian word ajab, wonderful. Asakarana had been joined in this benefaction by several of his relatives, whose names have been specified. He had earned the tilaka or forehead mark of Samghapati, i. e., the leader of a samgha, by organising pilgrimages to Arbuda (Abū) and Vimalāchala (Satrunjaya), and celebrated the Namdi festival in connection with the Suripada conferred upon Jinaraja. What this Nandi festival was I do not know. it is mentioned no less than three times in the Satrunjaya inscriptions, in editing which Dr. Bühler, however, wrongly supposed it to be Rūpanandi, instead of Nandi. The image was installed by Jinarajasūri of the Kharatara gachchha, in conjunction with Acharya Jinasagara and other jatis. This Jinasagara is no doubt the one, who in V. E. 1686 originated the eighth gachchhabheda (Ind. Ant. Vol. XI, p. 250, No. 63). Jinarāja is mentioned as the son of Dharma-sī and Dhārala-de and as belonging to the Bohittha family, unquestionably the same as Bohottar, an Osvāl sect. He is also spoken of as having received a boon from Ambikā, as having consecrated the Satruñjay-oddhara, and as having caused the image of Pārsvanātha installed in Bhāṇavada to pour out The Satrunjaya inscriptions reiterate the first fact, and record that the new images, etc., made in the Kharataravasi Tunk were all consecrated in V. E. 1675 by Jinarāja. But nothing is mentioned concerning his miracle at Bhāṇavada. Jinarāja was the pupil and successor of Jinasimha, who is said to have received the title of Yugapradhana from the emperor Jehangir. He also built vihāras or temples in Kabila (Kābul) and Kāshmīra, and caused the edict of non-slaughter to be proclaimed in Srikara, Sripura (Srinagar) and Garjjānāka (Gazni). Almost the same things are repeated in the Satrunjaya inscriptions, but Bühler, I think, has wrongly read Kathina instead of Kabila, which is the same as Kābila, by which Kābul is still known in Mārwār. Jinasimha was the pupil and successor of Jinachamdra, on whom, it is said, the title of Yugapradhana was conferred by Akbar.
 - 62. Precisely on the same date as of the last inscription the same pontiff Jinarāja consecrated two other images set up by the same samphapati Āsakaraṇa. One of these was of Ādiśvara, the principal image in the temple called Navo-Mandir. The other was of Ajitanātha in the Pancha-tīrthiyāro mandir. The inscription on the latter image gives us additional information about Jinachamdrasūri. He caused the edict of non-slaughter to be annually promulgated during the periods of Ashṭāhika and Shāṇmāsika, saved the lives

of fish and other aquatic animals in the sea near Stambhatīrtha, i. e., Cambay, and caused the tax at Satruñjaya and other places to be discontinued. He is also called paincha-nadī-pīra-sādhaka, the meaning of which is not clear to me. In the consecration of this last Tīrthamkara, we are told, Jinarāja had been assisted by upādhyāya Samayarāja, vāchakas Hamsapramoda, Samayasundara and Puṇyapradhāna. Of these Samayarāja was a pupil of Jinachandra, and Samayasundara the preceptor of Harshanandana. A fourth inscription is dated Samvat 1659 varshe Māha sudi 5 dine Śukravāre, and refers itself to the reign of Sūryasinha, i. e., the Rāṭhoḍ Rājā Soor of Jodhpur. But the earliest record of this gachchha here has the date 1507 V. E., and speaks of an image of Śāntinātha as being installed by Jinabhadra and Jinasāgara. The names of the, Tapāgachchha pontiffs are also not wanting. Thus one inscription begins with the date Sam. 1653 varshe Vai. Su. 4 Budhe, and records the setting up of the image of Śāntinātha by one Padama-sī of the Gādahīā gotra, and the installation thereof by Vijayasenasūri of the Tapāgachchha. Inscriptions of the time of his pupil Vijayadevasūri are dated V. E. 1677-1687. The earliest record of this gachchha refers to the consecration of an image of Sumatinātha by Hemavimalasūri, and bears the date Samvat 1569 varshe Māgha śudi 13.

- 63. In the Sojatiā gate at Medtā is an inscription stone, built into the wall, but which originally belonged to Phalodī. It is dated Samvat 1405 varshe Kārtika sudi 11 Ravi-dine, and refers itself to the reign of Rāṇā Karama-sī, son of Rāṇā Guhilauta Medada. Karama-sī then ordains that the pujārīs of the temples of both Phalaudhī (Phalavardhikā) and Pārśvanātha were only those Brāhmaṇas, who were descended from Lokeśvara. In my description of Phalodī I have stated that both the temples have the same pujārīs, who are of the Sevak Brāhmaṇa caste. They still remember their ancestor Lokeśvara, who was originally at Jhālīvādī. This inscription also shews that the territory round about Phalodī was originally in the possession of the Guhilots.
- 64. Medtā is famous for small lakes. They are mostly on the eastern and western faces of the town, such as Mūtā-Nādi, Jeṭhāni, Dāngolāī, Kuṇḍālā and Bepchā. On the borders of this last is an old pleasant garden with some Muhammadan structures. On the bund of the Dāngolāī is a tomb of De Bourbon, a Frenchman, captain of infantry, wounded in the service of Mahārājā Scindia on the 11th September 1790 and died in consequence on the 18th idem, aged sixty-one. The inscription is in French on a white marble slab. This battle was fought near Medtā in A. D. 1790 between the Marāṭhās and the Rāṭhods.

D. R. BHANDARKAR,

Assistant Superintendent, Archæological Survey,
Western Circle.

Poona, 30th June 1910.
